State Profile Report
05.13.2022

South Carolina

State Synopsis

	Last Week	Change from Previous Week
New COVID-19 Cases per 100,000	**58**	**-14%**
Nucleic Acid Amplification Test (NAAT) positivity rate	**11.9%**	**+2.7%**
New Confirmed COVID-19 Hospital Admissions per 100,000	**2.7**	**-1%**
New COVID-19 Deaths per 100,000	**0.3**	**-78%**

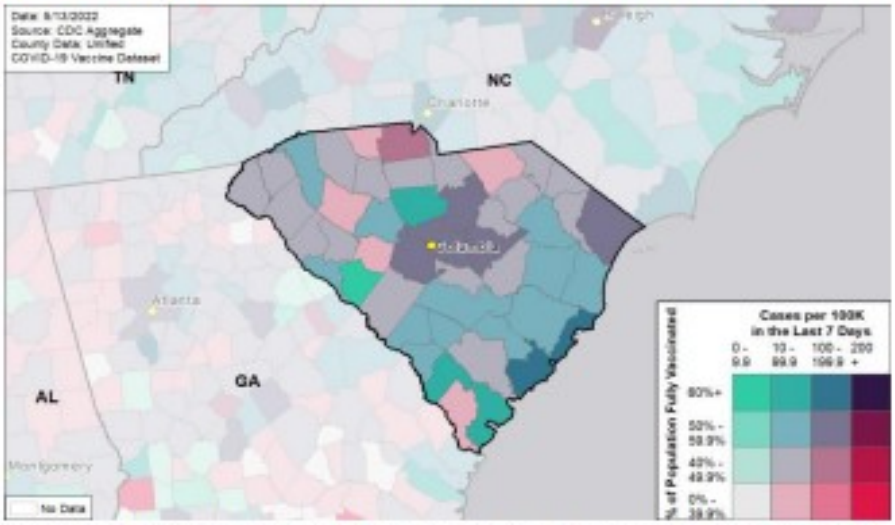
COVID-19 Vaccinations

Total fully vaccinated	**2,941,841 people**	**57.1% of total pop.**
5-11 years fully vaccinated	**78,167 people**	**17.9% of 5+ pop.**
12+ years fully vaccinated	**2,862,225 people**	**64.8% of 12+ pop.**
65+ years received booster	**523,771 people**	**63.8% of fully vaccinated 65+ pop.**

SARS-CoV-2 Variants of Concern

- In the 4 weeks ending 4/16/2022, the following proportions of variants of concern were identified in South Carolina: Omicron: B.1.1.529, 17.1%; BA.2, 68.7%; BA.2.12.1, 14.2%

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated



Starting 11/1/21, several states shifted to the use of report date; this change may result in fluctuations of weekly values and/or week-on-week changes.

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to https://wwwn.cdc.gov/dcs/ContactUs/Form.

COVID-19

COVID-19

South Carolina

State Profile Report | 05.13.2022

	State	State, % change from previous week	FEMA/HHS Region	United States
New COVID-19 Cases (rate per 100,000)	2,964 (58)	-14%	86,053 (129)	611,680 (184)
Nucleic Acid Amplification Test (NAAT) Positivity Rate	11.9%	+2.7%*	12.5%	9.7%
TOTAL NAAT Volume † (tests per 100,000)	26,739 (519)	-13%	592,847 (886)	5,048,267 (1,521)
New COVID-19 Deaths (rate per 100,000)	18 (0.3)	-78%	256 (0.4)	1,906 (0.6)
Confirmed new COVID-19 Hospital Admissions (rate per 100,000)	139 (2.7)	-1%	2,941 (4.4)	18,566 (5.6)
COVID-19 Inpatient Occupancy	1%	0%*	1%	2%
Hospitals With Supply Shortages (%)	7 (10%)	+17%	34 (3%)	191 (4%)
COVID-19 Vaccinations				
5-11 years first dose (% of population)	464 (0.1%)	-75.3%	5,591 (0.1%)	20,355 (0.1%)
5-11 years fully vaccinated (% of population)	414 (0.1%)	-80.2%	5,623 (0.1%)	36,536 (0.1%)
12+ years first dose (% of population)	4,219 (0.1%)	-75.2%	67,066 (0.1%)	N/A
12+ years fully vaccinated (% of population)	4,197 (0.1%)	-76.9%	65,651 (0.1%)	440,423 (0.2%)
12+ years booster dose	5,792	-81.6%	80,614	996,061
65+ years booster dose	2,432	-82.6%	31,997	290,104

* Indicates absolute change in percentage points.
† Due to delayed reporting, this figure may underestimate total diagnostic tests and week-on-week changes in diagnostic tests.

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Cases and Deaths: State values are aggregated data provided by the states to the CDC. Historical reports of cases and deaths exceeding 1% of the total new cases or deaths reported in the US that day have been excluded. Data are through 5/12/2022; previous week is from 4/29 to 5/5.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Test positivity through 5/10/2022; previous week is from 4/27 to 5/3. Test volume through 5/6/2022; previous week is from 4/23 to 4/29.

Admissions: Unified Hospitals Dataset in HHS Protect. Data are through 5/11, previous week is from 4/28 to 5/4.

Shortages: Unified Hospitals Dataset in HHS Protect. Values presented show the latest reports from hospitals in the week ending 5/11/2022 for supplies.

Vaccinations: CDC COVID Data Tracker. Data include the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 13:03 EDT on 05/13/2022. Data last updated 06:00 EDT on 05/13/2022. People initiating vaccination include those who have received the first dose of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Population denominators reflect the subset of the population of the corresponding age range. California recently issued corrections to their vaccination data, resulting in negative values for some vaccination trends in the US in the last week.

METHODS: Details available on last two pages of report.

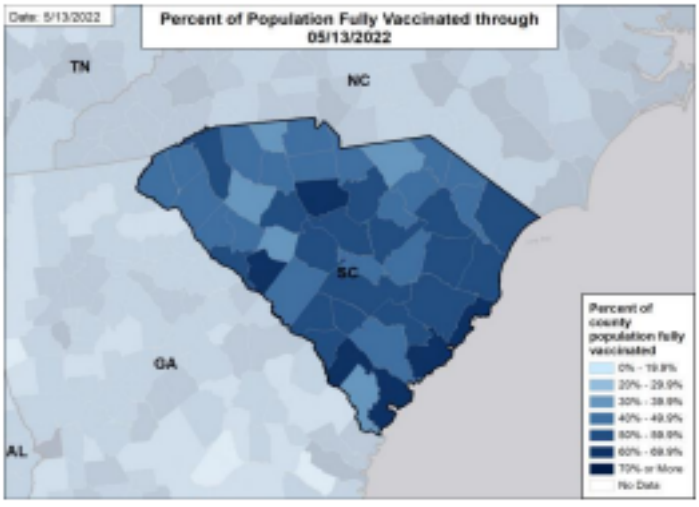
State Vaccination Summary

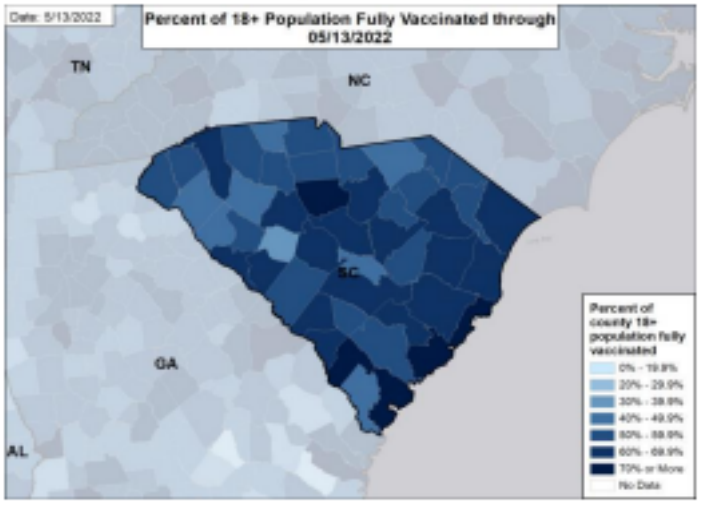
Doses Delivered	10,668,175 207,201 per 100k	**Doses Administered**	7,572,355 147,073 per 100k

Age Group	At Least One Dose	Fully Vaccinated	Booster Dose
Total	3,489,218 (67.8%)	2,941,841 (57.1%)	1,179,996 (40.1%)
5-11 years	98,558 (22.6%)	78,167 (17.9%)	N/A
12-17 years	200,423 (52.4%)	169,506 (44.3%)	27,687 (16.3%)
18+ years	3,187,630 (79.0%)	2,692,719 (66.7%)	1,152,111 (42.8%)
65+ years	958,629 (95.0%)	820,610 (87.6%)	523,771 (63.8%)

Percent of Population Fully Vaccinated



Percent of 18+ Population Fully Vaccinated



DATA SOURCES
County reporting completeness for South Carolina is 93.1%.
Vaccinations: CDC COVID Data Tracker. Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 13:03 EDT on 05/13/2022. Data last updated 06:00 EDT on 05/13/2022. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine.
METHODS: Details available on last two pages of report.

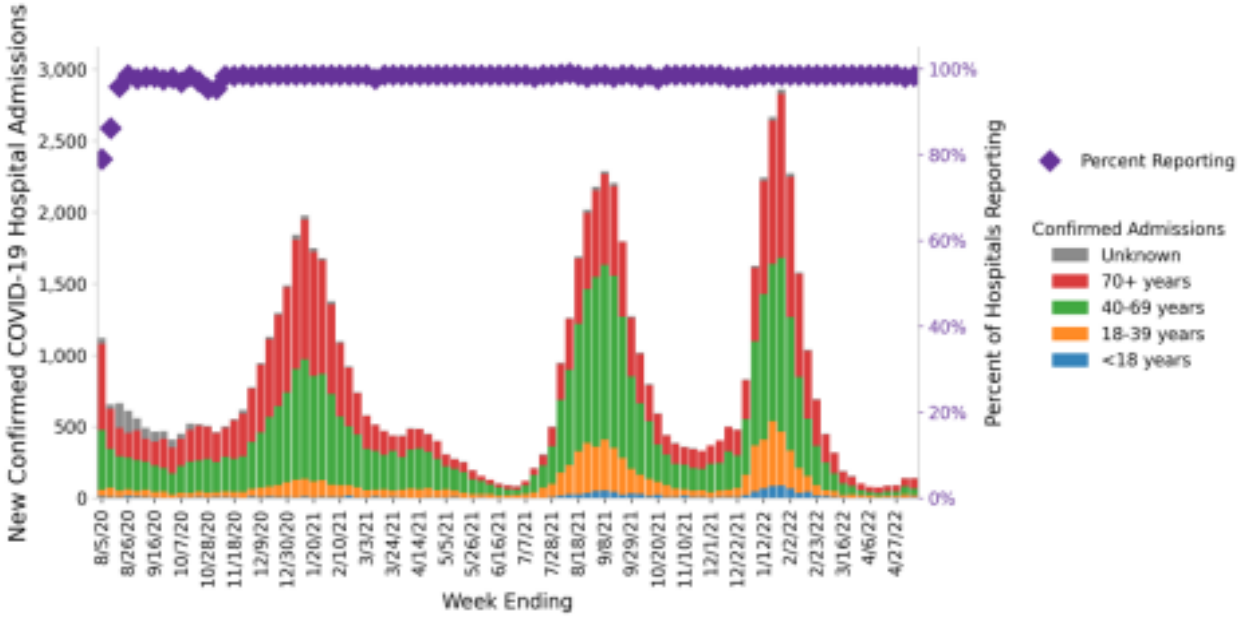
COVID-19

South Carolina

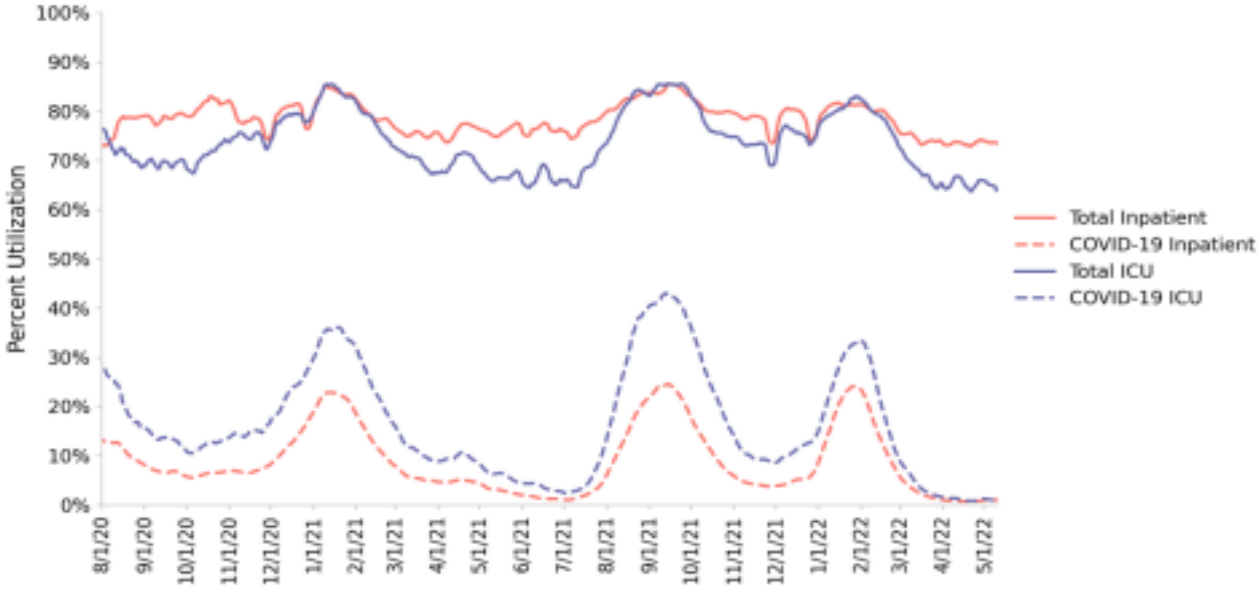
State Profile Report | 05.13.2022

68 hospitals are expected to report in South Carolina

Hospital Admissions



Hospital Utilization



DATA SOURCES

Hospitalizations: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Inpatient and ICU utilization is shown as a weekly rate; the weekly average of beds occupied is divided by the weekly average of total beds available. Data are through 5/11/2022.

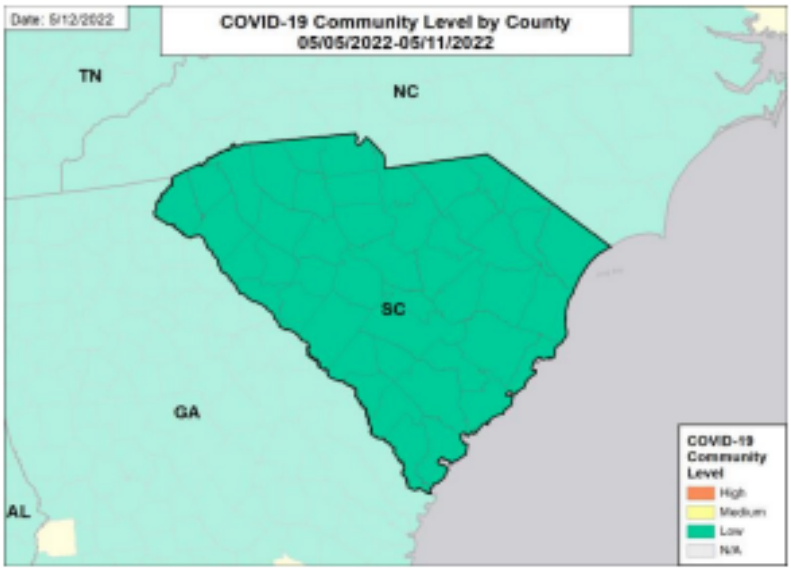
METHODS: Details available on last two pages of report.

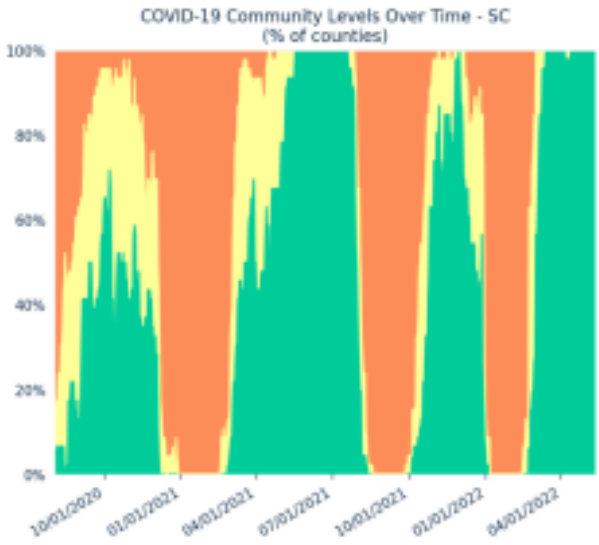
COVID-19

South Carolina

State Profile Report | 05.13.2022

COVID-19 Community Level by county





Counties by COVID-19 Community Level

Category	Low	Medium	High
# of Counties (change)	46 (0)	0 (0)	0 (0)

All Low Counties: Abbeville, Aiken, Allendale, Anderson, Bamberg, Barnwell, Beaufort, Berkeley, Calhoun, Charleston, Cherokee, Chester, Chesterfield, Clarendon, Colleton, Darlington, Dillon, Dorchester, Edgefield, Fairfield, Florence, Georgetown, Greenville, Greenwood, Hampton, Horry, Jasper, Kershaw, Lancaster, Laurens, Lee, Lexington, Marion, Marlboro, McCormick, Newberry, Oconee, Orangeburg, Pickens, Richland, Saluda, Spartanburg, Sumter, Union, Williamsburg, York

DATA SOURCES
Maps and figures reflect 7-day average of data from 5/5-5/11 (cases), 5/4-5/10 (hospital data). Metro areas and counties are listed in alphabetical order.
Note: Most recent days may have incomplete reporting.
Cases: County-level data are from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data are through 5/11/2022.
Admissions: Unified Hospitals Dataset in HHS Protect. Data are through 5/10/2022.
COVID-19 Community Levels: COVID-19 Community Level is determined by the higher of the new admissions and inpatient bed metrics, based on the current level of new cases per 100,000 population in the past 7 days. See CDC Community Levels. A county is N/A if hospital data is not available. County data is mapped from Health Service Areas, defined as a single county or cluster of counties that are generally self-contained with respect to hospital care. Previous week levels are computed based on current data.
METHODS: Details available on last two pages of report.

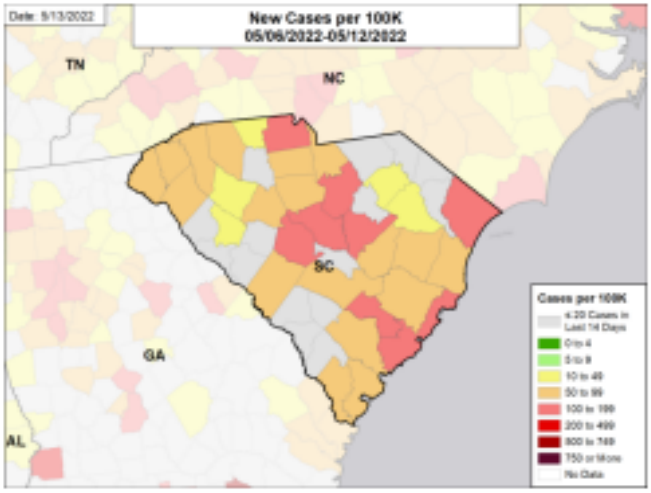
COVID-19

South Carolina

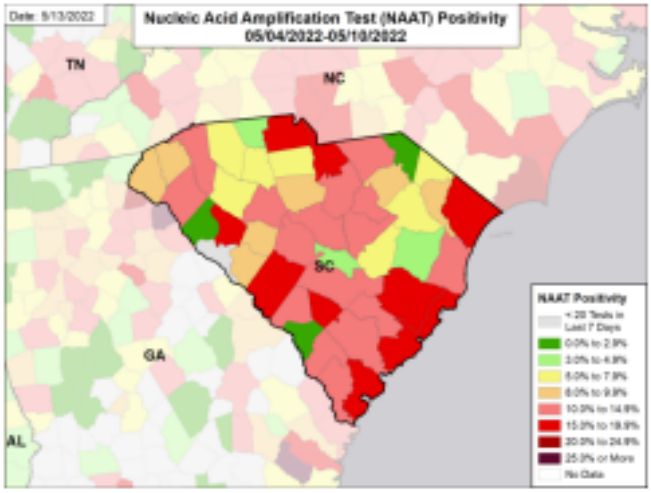
State Profile Report | 05.13.2022

Case Rates, NAAT Positivity, Hospital Admissions, and Death Rates

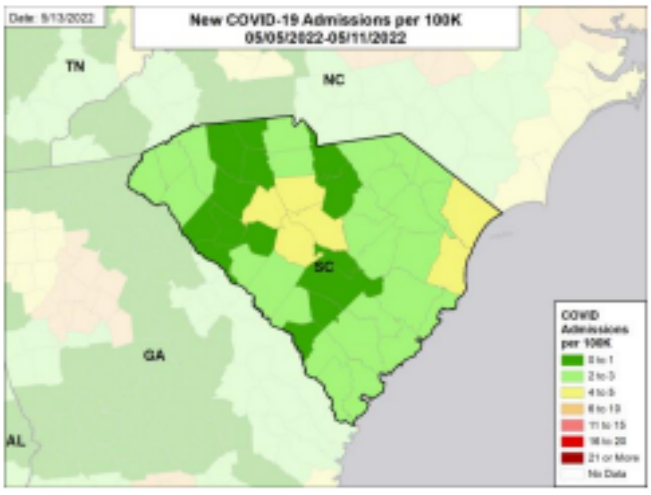
New Cases per 100,000



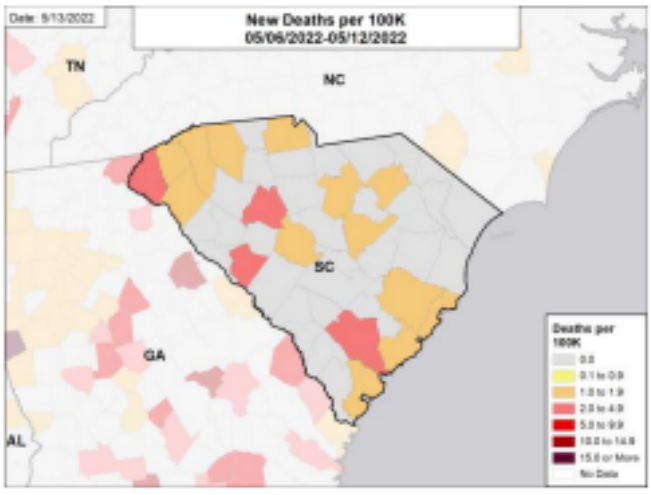
Nucleic Acid Amplification Test (NAAT) Positivity



Confirmed new COVID-19 Admissions per 100,000



New Deaths per 100,000



DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Cases and Deaths: County-level data are from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data are through 5/12/2022.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Data are through 5/10/2022.

Hospitalizations: Unified Hospitals Dataset in HHS Protect. Totals include only confirmed COVID-19 admissions. County data is mapped from Health Service Areas, defined as a single county or cluster of counties that are generally self contained with respect to hospital care. Hospitals are assigned to an HSA based on county of location. In some cases, reports are aggregates of multiple facilities that cross HSA boundaries; in these cases, values are assigned based on the county for the aggregate. Data are through 5/11/2022.

METHODS: Details available on last two pages of report.

Percent of 18+ Years Population Fully Vaccinated

Percent of 65+ Years Population Fully Vaccinated

DATA SOURCES
Vaccinations: CDC COVID Data Tracker. Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 13:03 EDT on 05/13/2022. Data last updated 06:00 EDT on 05/13/2022. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. The following states have ≤80% completeness reporting vaccinations by county, which may result in underestimates of vaccination data for counties: VA (79%), GU (75%), VT (74%), and HI (0%).
METHODS: Details available on last two pages of report.

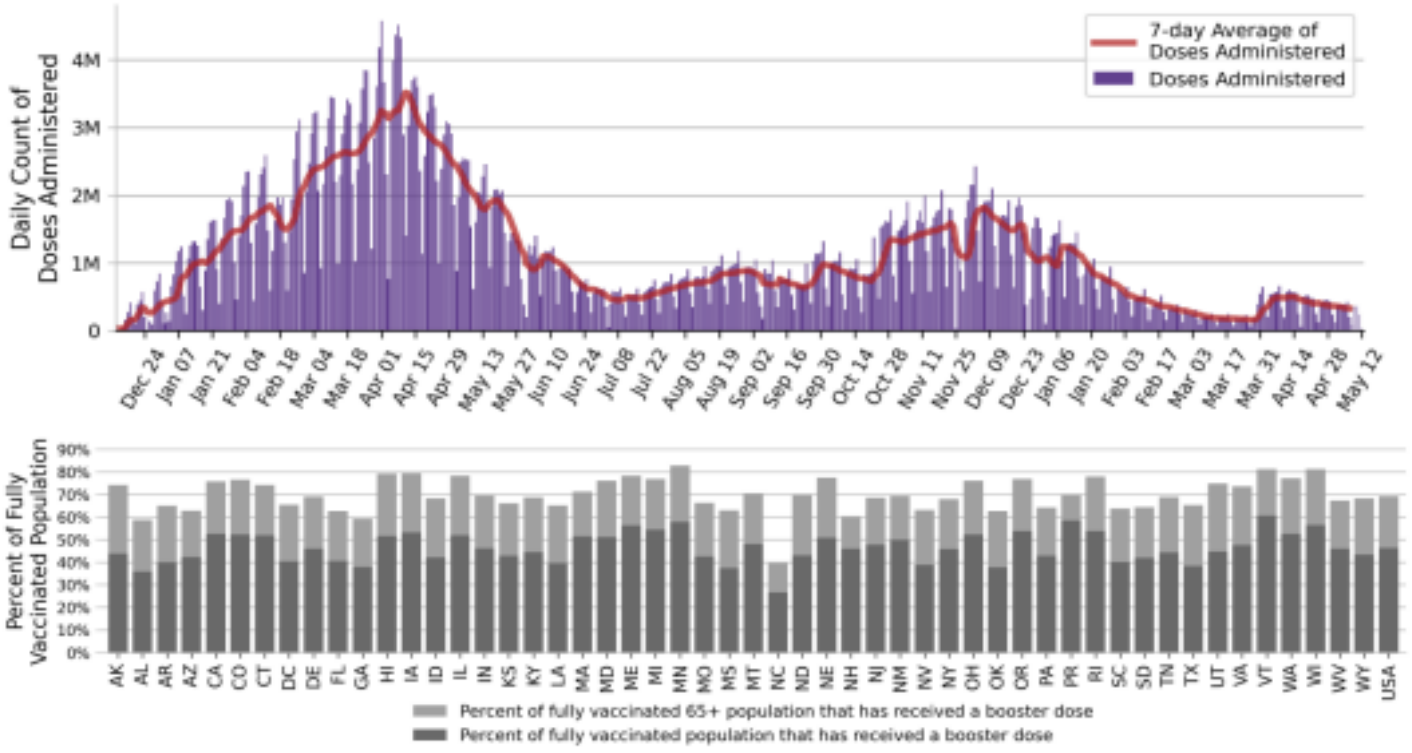
COVID-19

National Picture: Vaccinations

National COVID-19 Vaccine Summary as of 5/13

Doses Delivered	736,029,755 221,690 per 100k	**Doses Administered**	580,915,871 174,970 per 100k
Received At Least One Dose	257,738,565 77.6% of total pop.	**Fully Vaccinated**	220,502,022 66.4% of total pop.
5-11 Years Received At Least One Dose	10,192,960 35.5% of 5-11 pop.	**5-11 Years Fully Vaccinated**	8,280,391 28.8% of 5-11 pop.
12-17 Years Received At Least One Dose	17,499,931 69.3% of 12-17 pop.	**12-17 Years Fully Vaccinated**	14,989,495 59.3% of 12-17 pop.
18+ Years Received At Least One Dose	229,929,716 89.0% of 18+ pop.	**18+ Years Fully Vaccinated**	197,177,259 76.3% of 18+ pop.
65+ Years Received at Least One Dose	56,792,786 95.0% of 65+ pop.	**65+ Years Fully Vaccinated**	49,664,198 90.6% of 65+ pop.
Received Booster Dose	102,094,302 46.3% of fully vaccinated total pop.	**65+ Years Received Booster Dose**	34,354,289 69.2% of fully vaccinated 65+ pop.

Daily National Count of Vaccine Doses Administered by Date of Administration



DATA SOURCES

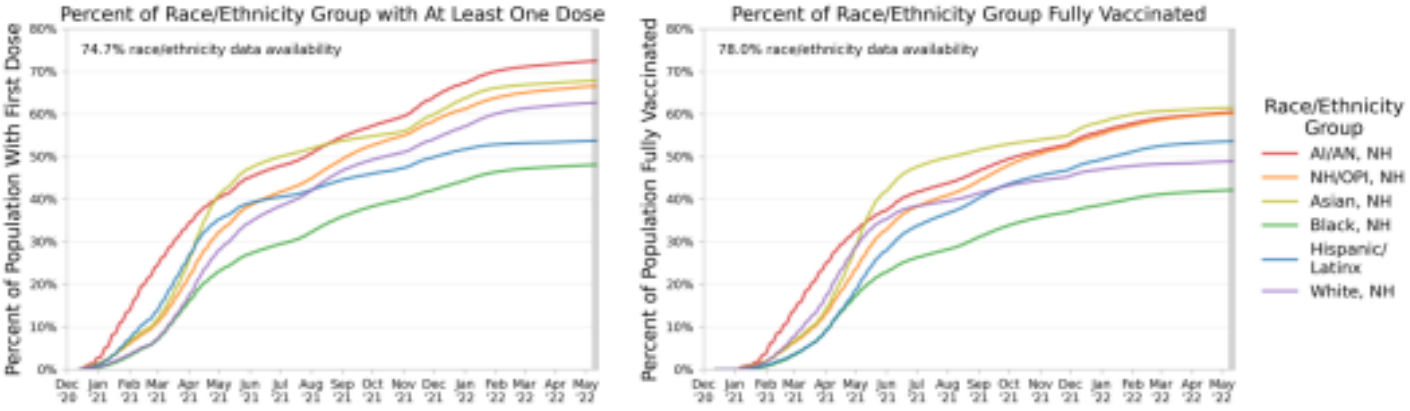
Vaccinations: CDC COVID Data Tracker. Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 13:03 EDT on 05/13/2022. Data last updated 06:00 EDT on 05/13/2022. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. The count of people who received a booster dose includes anyone who is fully vaccinated and has received another dose of COVID-19 vaccine since August 13, 2021. This includes people who received booster doses and people who received additional doses. Due to delays in reporting, data on doses administered in recent days (as reflected by lighter purple coloring in the Daily National Count figure) may be an underestimate of the actual value.

METHODS: Details available on last two pages of report.

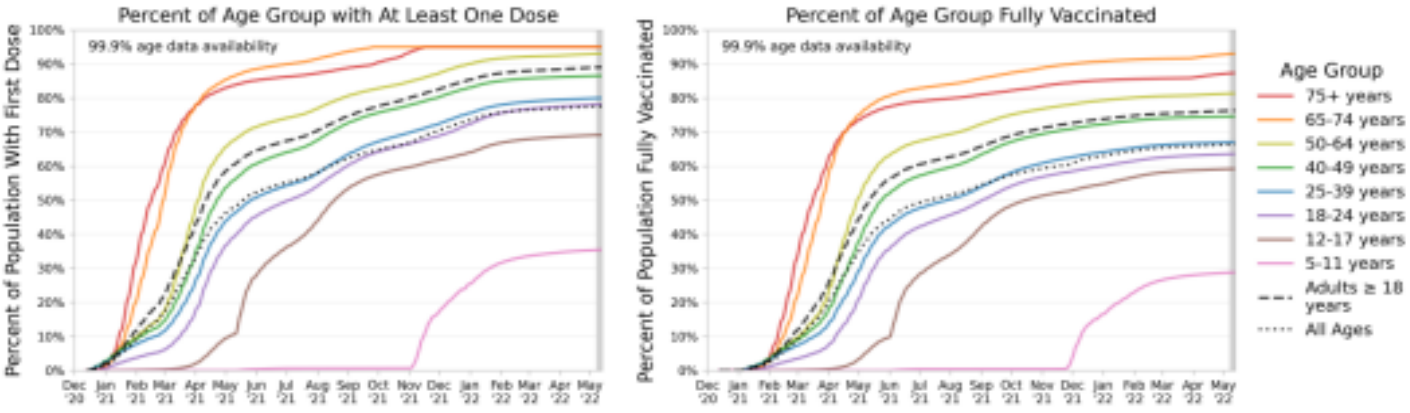
COVID-19

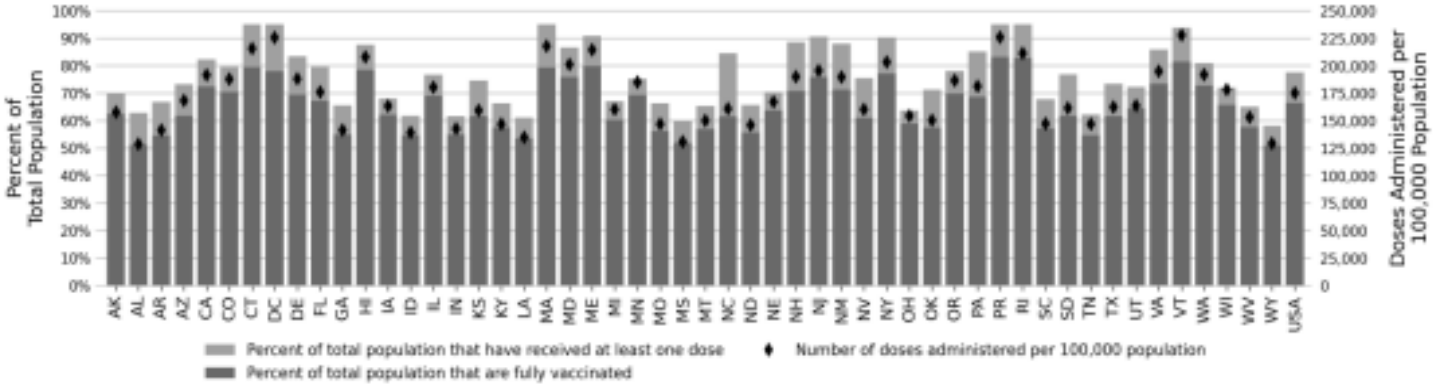
National Picture: Vaccinations

National Summary of Vaccinations by Race/Ethnicity



National Summary of Vaccinations by Age





DATA SOURCES

Vaccinations: CDC COVID Data Tracker. Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 13:03 EDT on 05/13/2022. Data last updated 06:00 EDT on 05/13/2022. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Race/Ethnicity data were available for 74.7% receiving at least one dose and 78.0% fully vaccinated. Age data were available for 100.0% receiving at least one dose and 100.0% fully vaccinated. Texas does not report demographic-specific dose number information to CDC, so data for Texas are not represented in demographic trends figures. "NH" stands for Non-Hispanic/Latinx, "AI/AN" stands for American Indian or Alaska Native, and "NH/PI" stands for Native Hawaiian or Pacific Islander.

METHODS: Details available on last two pages of report.

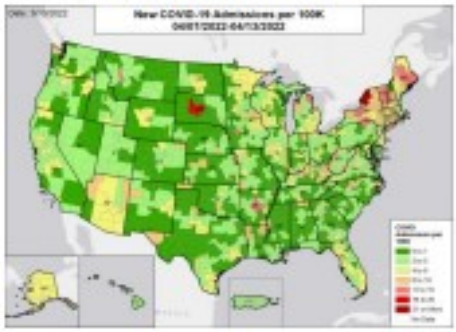
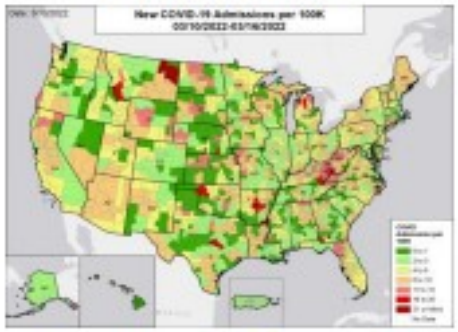
Confirmed New COVID-19 Admissions per 100,000 in the Week:

One Month Before



Two Months Before



Three Months Before

DATA SOURCES
Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.
Admissions: Unified Hospitals Dataset in HHS Protect through 5/11/2022. Totals include only confirmed COVID-19 admissions. The week one month before is from 4/7 to 4/13; the week two months before is from 3/10 to 3/16; the week three months before is from 2/10 to 2/16. County data is mapped from Health Service Areas, defined as a single county or cluster of counties that are generally self contained with respect to hospital care. Hospitals are assigned to an HSA based on county of location. In some cases, reports are aggregates of multiple facilities that cross HSA boundaries; in these cases, values are assigned based on the county for the aggregate.
METHODS: Details available on last two pages of report.

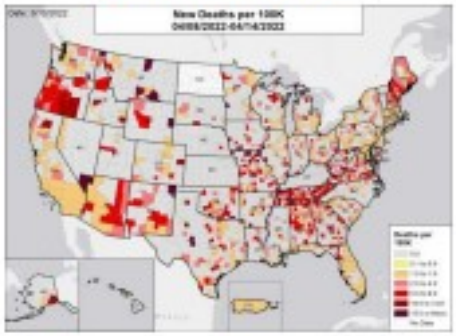
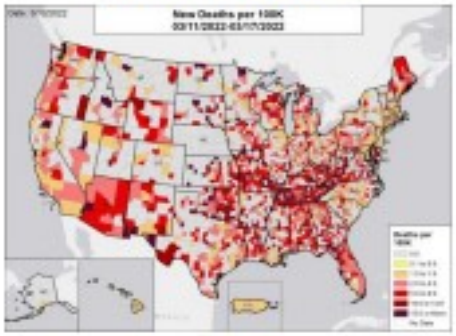
New Deaths per 100,000 in the Week:

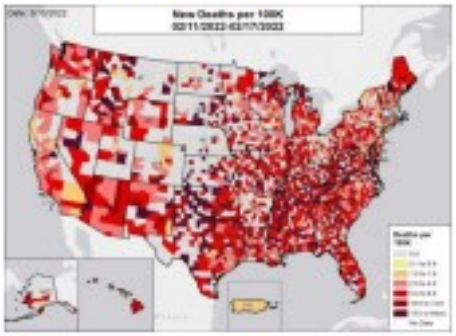
One Month Before



Two Months Before



Three Months Before



DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes. Some states report deaths by date of death, periodically backfilling from their data by date of report. This can result in under-estimates or fluctuations in the number of deaths reported in the last week.

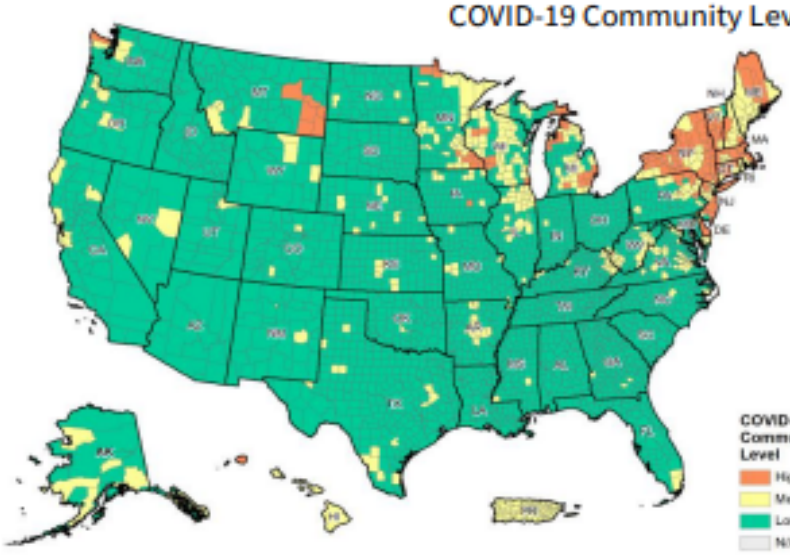
Deaths: County-level data are from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. State values are aggregated data provided by the states to the CDC. As of 3/2/2021, Ohio changed their method of reporting COVID-19 deaths and will report deaths on the day of death, not the day of report, which could result in a fluctuation in the number of deaths from recent weeks due to delayed reporting. As of 4/7/2022, North Dakota is no longer reporting county-level deaths; therefore, county-level death counts from this date forward are no longer available. Puerto Rico is shown at the territory level as deaths are not reported at the municipio level. The week one month before is from 4/8 to 4/14; the week two months before is from 3/11 to 3/17; the week three months before is from 2/11 to 2/17. Due to data delays, Florida has not updated county deaths in the last week.

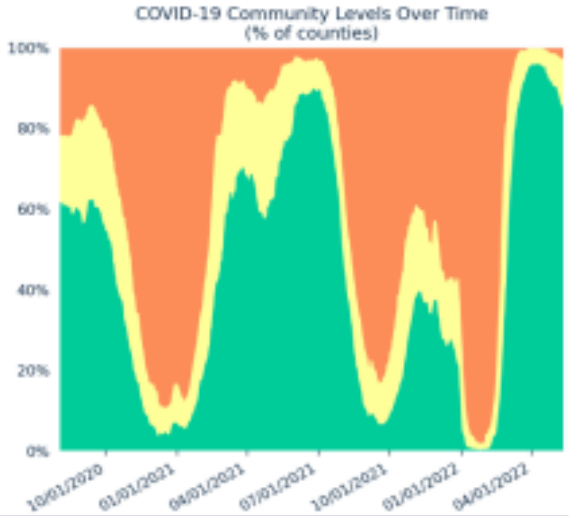
METHODS: Details available on last two pages of report.

COVID-19

National Picture: COVID-19 Community Level

COVID-19 Community Level by County





Counties by COVID-19 Community Level Component Metrics

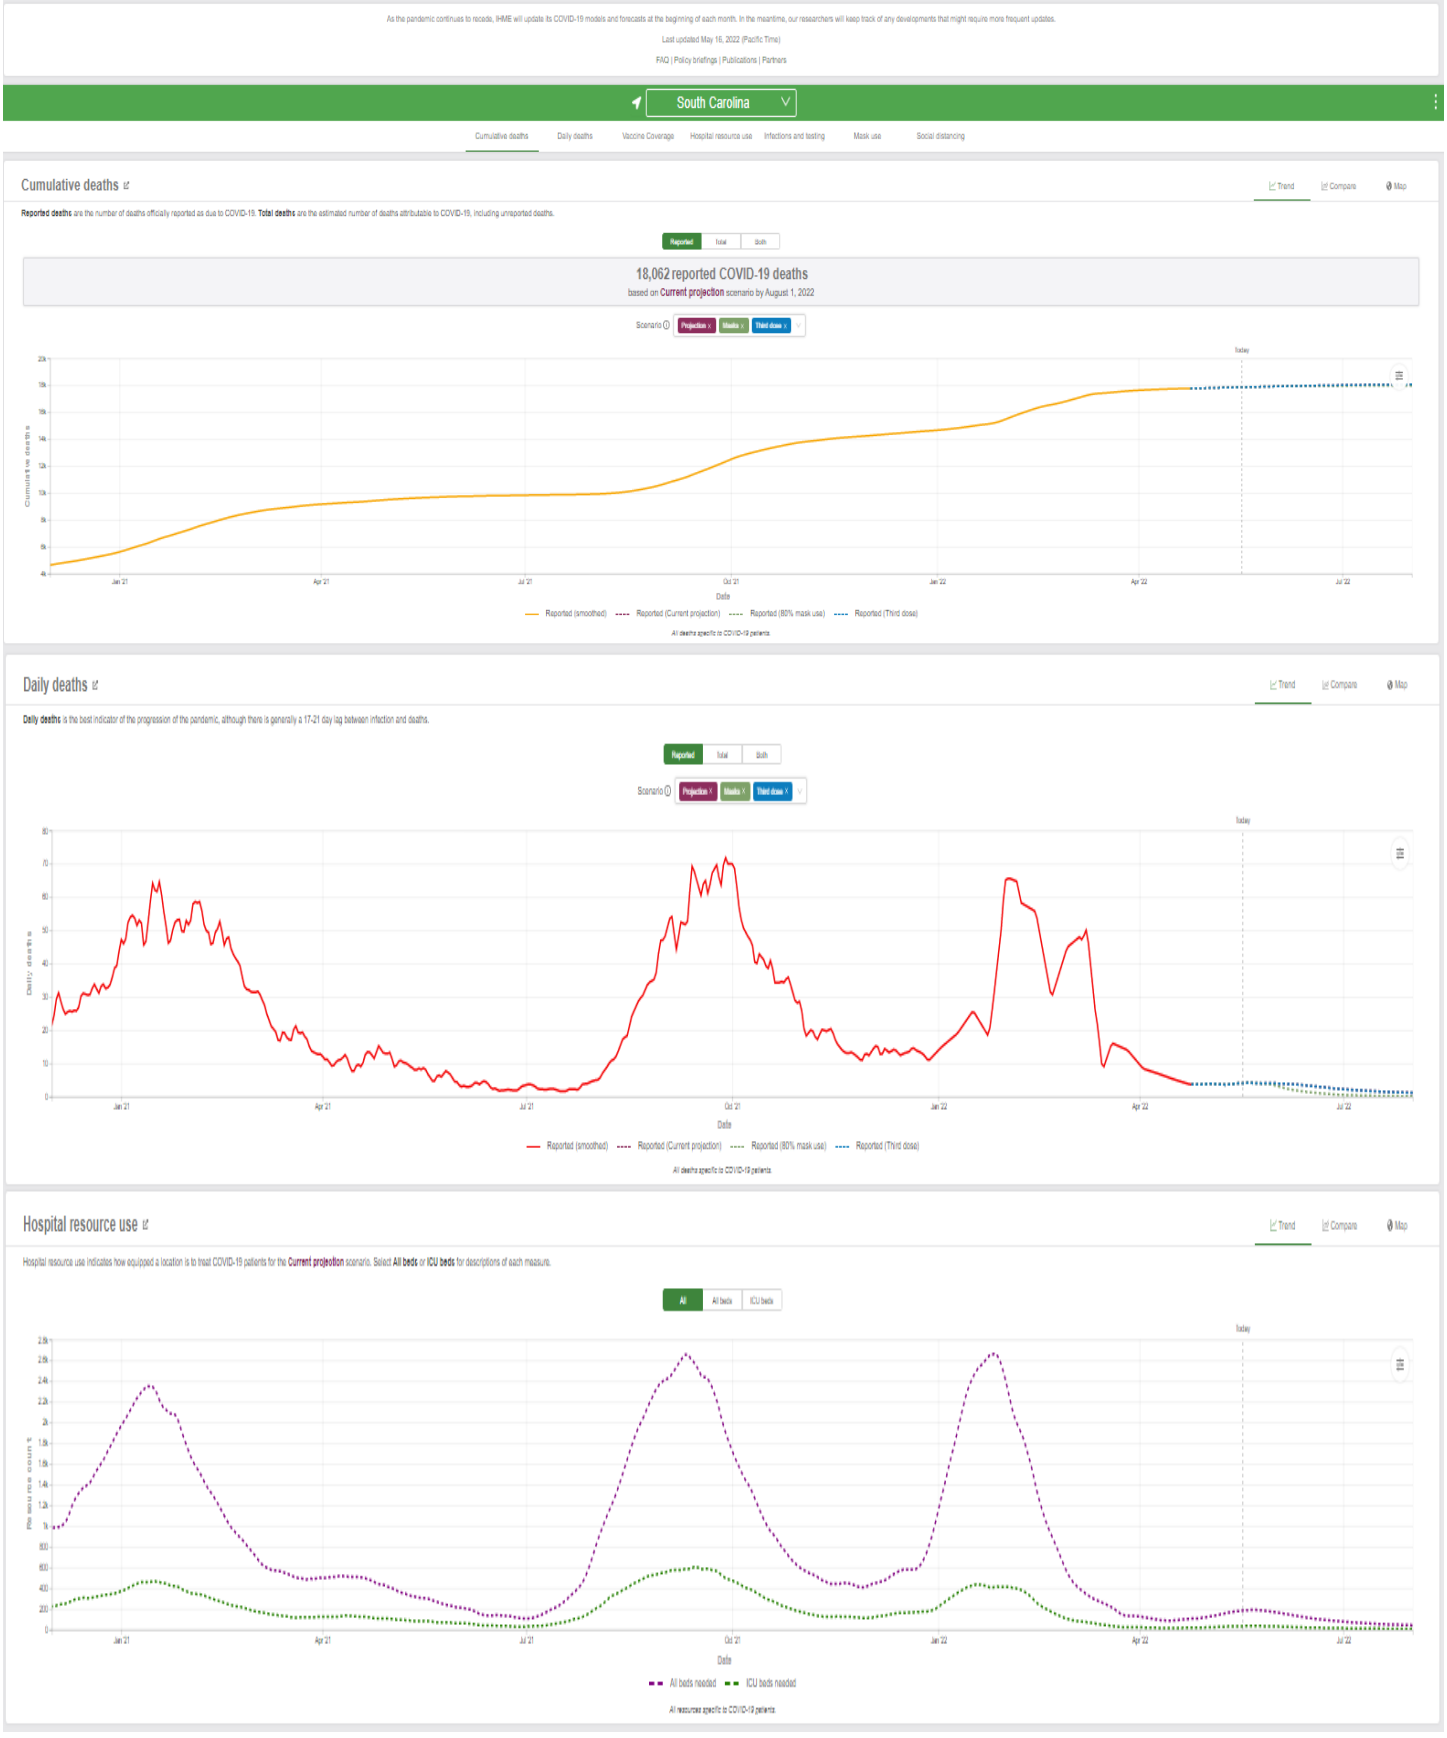
<200 Cases per 100K			
Admissions per 100K	**<10.0**	**10.0 TO 19.9**	**20.0+**
# of Counties (Change)	2,633 (↓186)	97 (↑42)	10 (↑2)
% of Counties (Change)	81.8% (↓5.8%)	3.0% (↑1.3%)	0.3% (↑0.1%)
COVID Inpatient Occupancy	**<10.0%**	**10.0% TO 14.9%**	**15.0%+**
# of Counties (Change)	2,728 (↓144)	6 (↑2)	0 (0)
% of Counties (Change)	84.7% (↓4.5%)	0.2% (↑0.1%)	0.0% (0.0%)
200+ Cases per 100K			
Admissions per 100K	**N/A**	**<10.0**	**10.0+**
# of Counties (Change)	N/A	354 (↑88)	126 (↑54)
% of Counties (Change)	N/A	11.0% (↑2.7%)	3.9% (↑1.7%)
COVID Inpatient Occupancy	**N/A**	**<10.0%**	**10.0%+**
# of Counties (Change)	N/A	465 (↑136)	15 (↑6)
% of Counties (Change)	N/A	14.4% (↑4.2%)	0.5% (↑0.2%)

Counties by COVID-19 Community Level

Category	Low	Medium	High
# of Counties (Change)	2,630 (↓189)	453 (↑132)	137 (↑57)
% of Counties (Change)	81.7% (↓5.9%)	14.1% (↑4.1%)	4.3% (↑1.8%)

DATA SOURCES
Maps and figures reflect 7-day average of data from 5/5-5/11 (cases), 5/4-5/10 (hospital data).
Note: Most recent days may have incomplete reporting.
Cases: County-level data are from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data are through 5/11/2022. Due to data delays, Florida has not updated county cases in the last week.
Admissions: Unified Hospitals Dataset in HHS Protect. Data are through 5/10/2022.
County Percentages: Based on a denominator of 3,220 county/county-equivalents, including states, the District of Columbia, and Puerto Rico municipios.
COVID-19 Community Levels: COVID-19 Community Level is determined by the higher of the new admissions and inpatient bed metrics, based on the current level of new cases per 100,000 population in the past 7 days. See CDC Community Levels. A county is N/A if hospital data is not available. County data is mapped from Health Service Areas, defined as a single county or cluster of counties that are generally self-contained with respect to hospital care. Previous week levels are computed based on current data.
METHODS: Details available on last two pages of report.

IHME Model



As the pandemic continues to recede, IHME will update its COVID-19 models and forecasts at the beginning of each month. In the meantime, our researchers will keep track of any developments that might require more frequent updates.

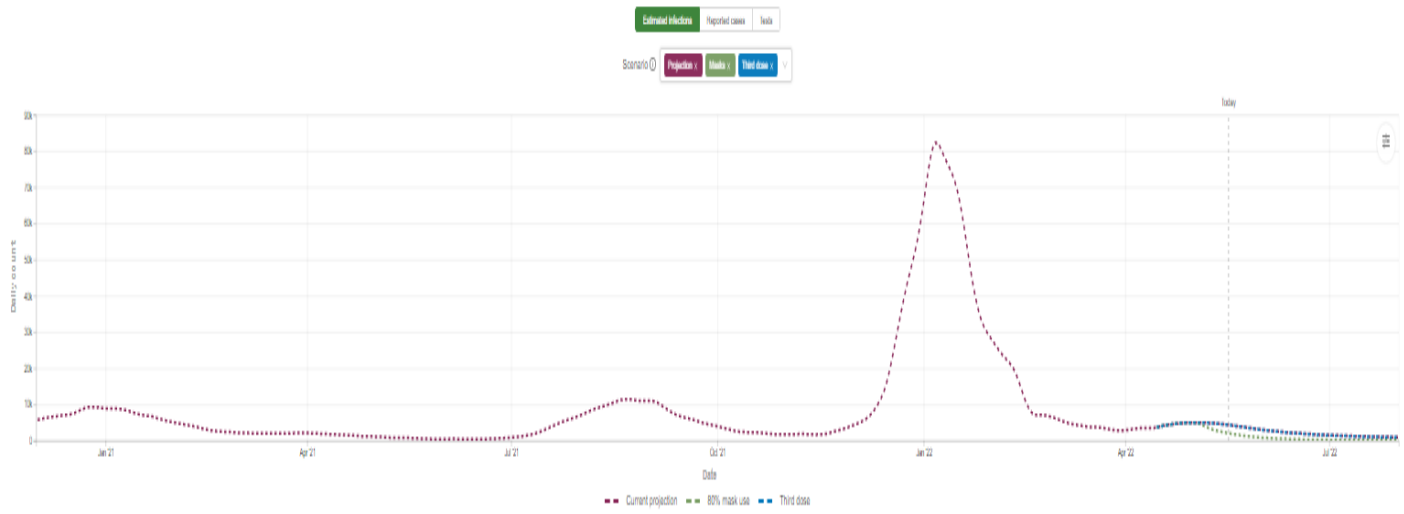
Daily infections and testing

Trend | Compare | Map

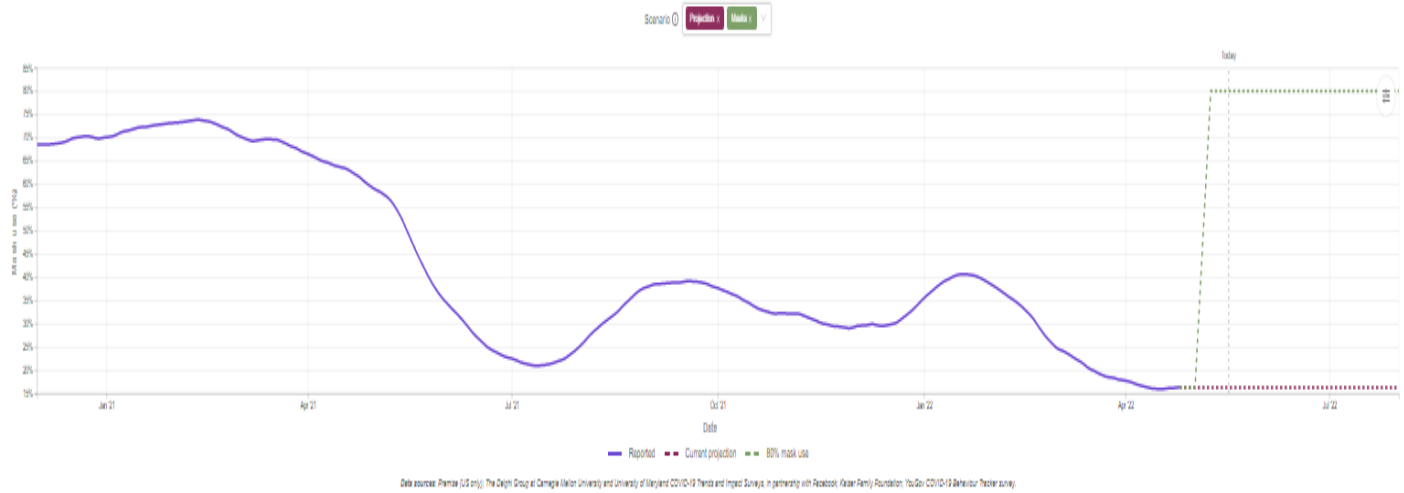
Estimated infections are the number of people we estimate are infected with COVID-19 each day, including those not tested.



Mask use

Trend | Compare | Map

Mask use represents the percentage of the population who say they always wear a mask in public. Mask use can reduce transmission by 30% or more.



Data sources: Premise (US only); The Delphi Group at Carnegie Mellon University and University of Maryland COVID-19 Trends and Impact Surveys, in partnership with Facebook; Kaiser Family Foundation; YouGov COVID-19 Behaviour Tracker survey.

Social distancing

Trend | Compare | Map

Reducing human contact (as measured by cell phone **mobility** data) can drive down infections so that mask use, testing, isolation, and contact tracing can work to contain the virus.
