STATE PROFILE REPORT
09.24.2021

SOUTH CAROLINA

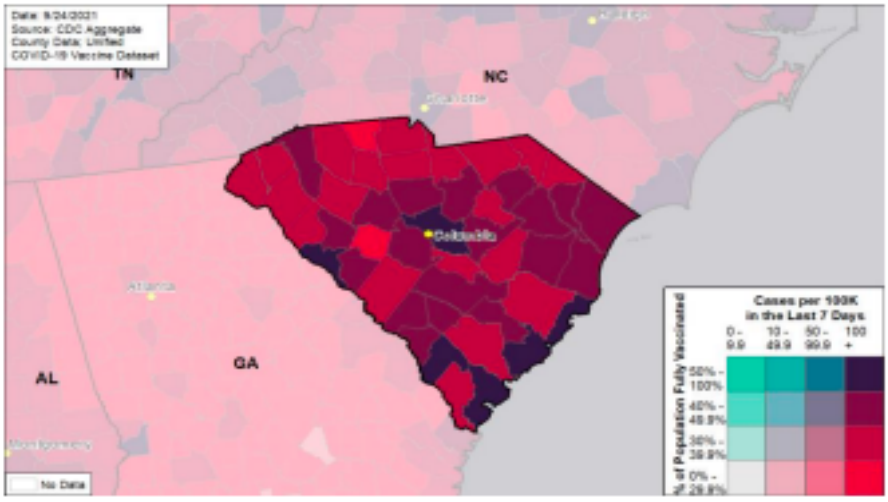
STATE SYNOPSIS

	LAST WEEK	CHANGE FROM PREVIOUS WEEK
RATE OF NEW COVID-19 CASES PER 100,000	458	-25%
NUCLEIC ACID AMPLIFICATION TEST (NAAT) POSITIVITY RATE	10.5%	-1.4%
NEW CONFIRMED COVID-19 HOSPITAL ADMISSIONS / 100 BEDS	17.6	-19%
RATE OF NEW COVID-19 DEATHS PER 100,000	5.7	-27%
COMMUNITY TRANSMISSION LEVEL	HIGH TRANSMISSION	
PEOPLE RECEIVED AT LEAST 1 DOSE	2,815,786 people	54.7% of total pop.
PEOPLE 18+ RECEIVED AT LEAST 1 DOSE	2,655,001 people	65.8% of 18+ pop.
PEOPLE FULLY VACCINATED	2,396,331 people	46.5% of total pop.
PEOPLE 18+ FULLY VACCINATED	2,273,141 people	56.3% of 18+ pop.

SARS-CoV-2 Variants of Concern

- The following proportions of variants of concern have been identified in South Carolina: B.1.1.7 (Alpha, 0.3%), B.1.617.2, AY.1, AY.2 (Delta, 96.7%)

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated



In map visualizations, test positivity data is now suppressed if there are strictly fewer than 20 total tests in the 7-day period.

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to https://www.cdc.gov/dcs/ContactUs/Form.

PEOPLE 12-17 INITIATING VACCINATION (PERCENT OF POPULATION)	4,151 (1.1%)	-29.5%	46,246 (0.9%)	227,986 (0.9%)
PEOPLE 18+ INITIATING VACCINATION (PERCENT OF POPULATION)	31,702 (0.8%)	-31.6%	385,278 (0.7%)	1,535,069 (0.6%)

* Indicates absolute change in percentage points.
** Due to delayed reporting, this figure may underestimate total diagnostic tests and week-on-week changes in diagnostic tests.

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.
Cases and Deaths: State values are aggregated data provided by the states to the CDC. Historical reports of cases and deaths exceeding 1% of the total new cases or deaths reported in the US that day have been excluded. Data are through 9/23/2021; previous week is from 9/10 to 9/16.
Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Test positivity through 9/21/2021; previous week is from 9/8 to 9/14. Test volume through 9/17/2021; previous week is from 9/4 to 9/10.
Admissions: Unified Hospitals Dataset in HHS Protect. Data are through 9/22, previous week is from 9/9 to 9/15.
Shortages: Unified Hospitals Dataset in HHS Protect. Values presented show the latest reports from hospitals in the week ending 9/22/2021 for staffing and the week ending 9/22/2021 for supplies.
Vaccinations: CDC COVID Data Tracker. Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 10:11 EDT on 09/24/2021. Data last updated 06:00 EDT on 09/24/2021. People initiating vaccination include those who have received the first dose of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Population denominators reflect the subset of the population of the corresponding age range.
METHODS: Details available on last two pages of report.

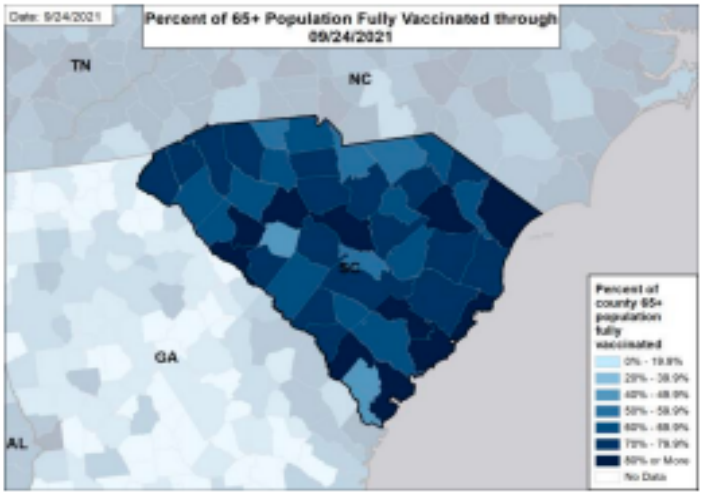
PERCENT OF 65+ POPULATION FULLY VACCINATED



DATA SOURCES

County reporting completeness for South Carolina is 93.8%.

Vaccinations: CDC COVID Data Tracker. Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 10:11 EDT on 09/24/2021. Data last updated 06:00 EDT on 09/24/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those whohave received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order.

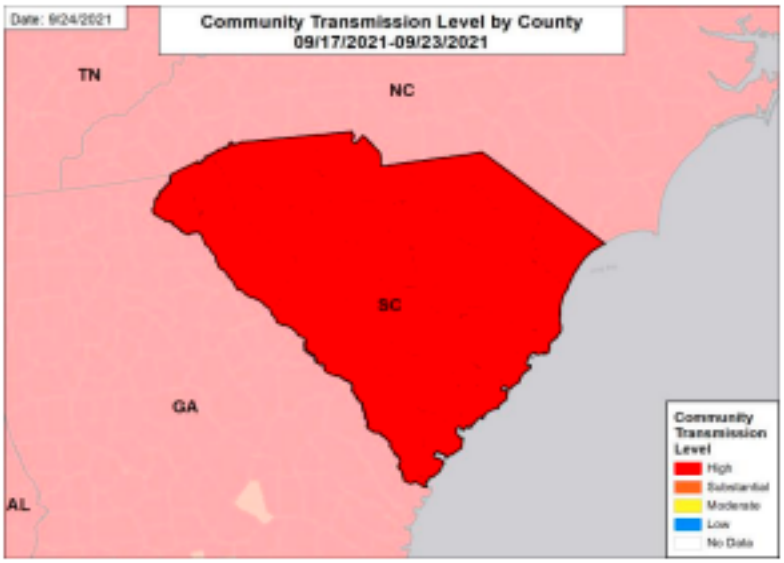
METHODS: Details available on last two pages of report.

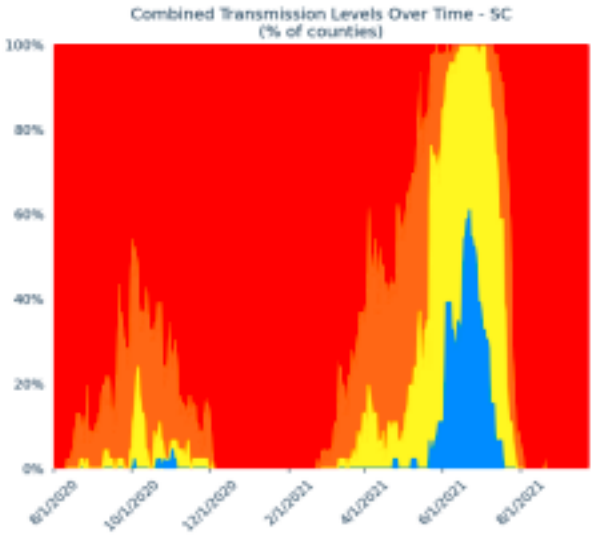
COVID-19

SOUTH CAROLINA

STATE PROFILE REPORT | 09.24.2021

COMMUNITY TRANSMISSION BY COUNTY AND METRO AREA





COUNTIES AND METRO AREAS BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF COUNTIES (CHANGE)	0 (0)	0 (0)	0 (0)	46 (0)
# OF METRO AREAS (CHANGE)	0 (0)	0 (0)	0 (0)	18 (0)

All Red Counties: Greenville, Horry, Spartanburg, Richland, Lexington, Charleston, Anderson, York, Dorchester, Berkeley, Pickens, Florence, Aiken, Beaufort, Oconee, Lancaster, Greenwood, Laurens, Darlington, Orangeburg, Cherokee, Sumter, Kershaw, Georgetown, Dillon, Marion, Chesterfield, Chester, Newberry, Williamsburg, Edgefield, Barnwell, Colleton, Marlboro, Abbeville, Clarendon, Union, Jasper, Fairfield, Hampton, Lee, Bamberg, Saluda, McCormick, Calhoun, Allendale

All Red CBSAs: Greenville-Anderson, Columbia, Charleston-North Charleston, Charlotte-Concord-Gastonia, Myrtle Beach-Conway-North Myrtle Beach, Spartanburg, Florence, Augusta-Richmond County, Hilton Head Island-Bluffton, Seneca, Greenwood, Sumter, Orangeburg, Gaffney, Georgetown, Newberry, Bennettsville, Union

DATA SOURCES

Maps and figures reflect 7-day average of data from 9/17-9/23 (cases), 9/15-9/21 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data are from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data are through 9/23/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data are through 9/21/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See CDC COVID Data Tracker.

METHODS: Details available on last two pages of report.

NEW CASES PER 100,000 IN THE WEEK:

ONE MONTH BEFORE

TWO MONTHS BEFORE

THREE MONTHS BEFORE

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Cases: County-level data are from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. State values are aggregated data provided by the states to the CDC. California reports COVID-19 cases at the state level on the day of incident, not the day of report, which could result in a fluctuation in the number of cases from recent weeks due to delayed reporting. As of 8/10/2021, Florida changed their method of reporting COVID-19 cases at the state level and will report on the day of incident, not the day of report, which could result in a fluctuation in the number of cases from recent weeks due to delayed reporting. As of 6/4, Florida is only updating their county case data on Fridays, therefore values for the last week may be an underestimate. As of 9/21, Nebraska began providing county case and death data directly to CDC, with daily data going back to 9/2. As of 6/30, Nebraska is no longer updating their state dashboard and since 5/26, Nebraska was reporting by Local Health Department instead of county; therefore, between 5/25 and 9/1 no county case and death data are available. The week one month before is from 8/20 to 8/26; the week two months before is from 7/23 to 7/29; the week three months before is from 6/25 to 7/1.

METHODS: Details available on last two pages of report.

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF COUNTIES (CHANGE)	20 (↑5)	49 (↑11)	82 (↑7)	3069 (↓23)
% OF COUNTIES (CHANGE)	0.6% (↑0.2%)	1.5% (↑0.3%)	2.5% (↑0.2%)	95.3% (↓0.7%)

DATA SOURCES

Maps and figures reflect 7-day average of data from 9/17-9/23 (cases), 9/15-9/21 (tests).

Note: Most recent days may have incomplete reporting.

Cases: County-level data are from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state Data are through 9/23/2021.

Testing: Combination of CELR (COVID-19 Electronic Lab Reporting) state health department-reported data and HHS Protect laboratory data (provided directly to Federal Government from public health labs, hospital labs, and commercial labs). Data are through 9/21/2021. Due to technical issues, Washington's test positivity cannot be calculated for the last week.

County Percentages: Based on a denominator of 3,220 county/county-equivalents, including states, the District of Columbia, and Puerto Rico municipios.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See CDC COVID Data Tracker.

METHODS: Details available on last two pages of report.

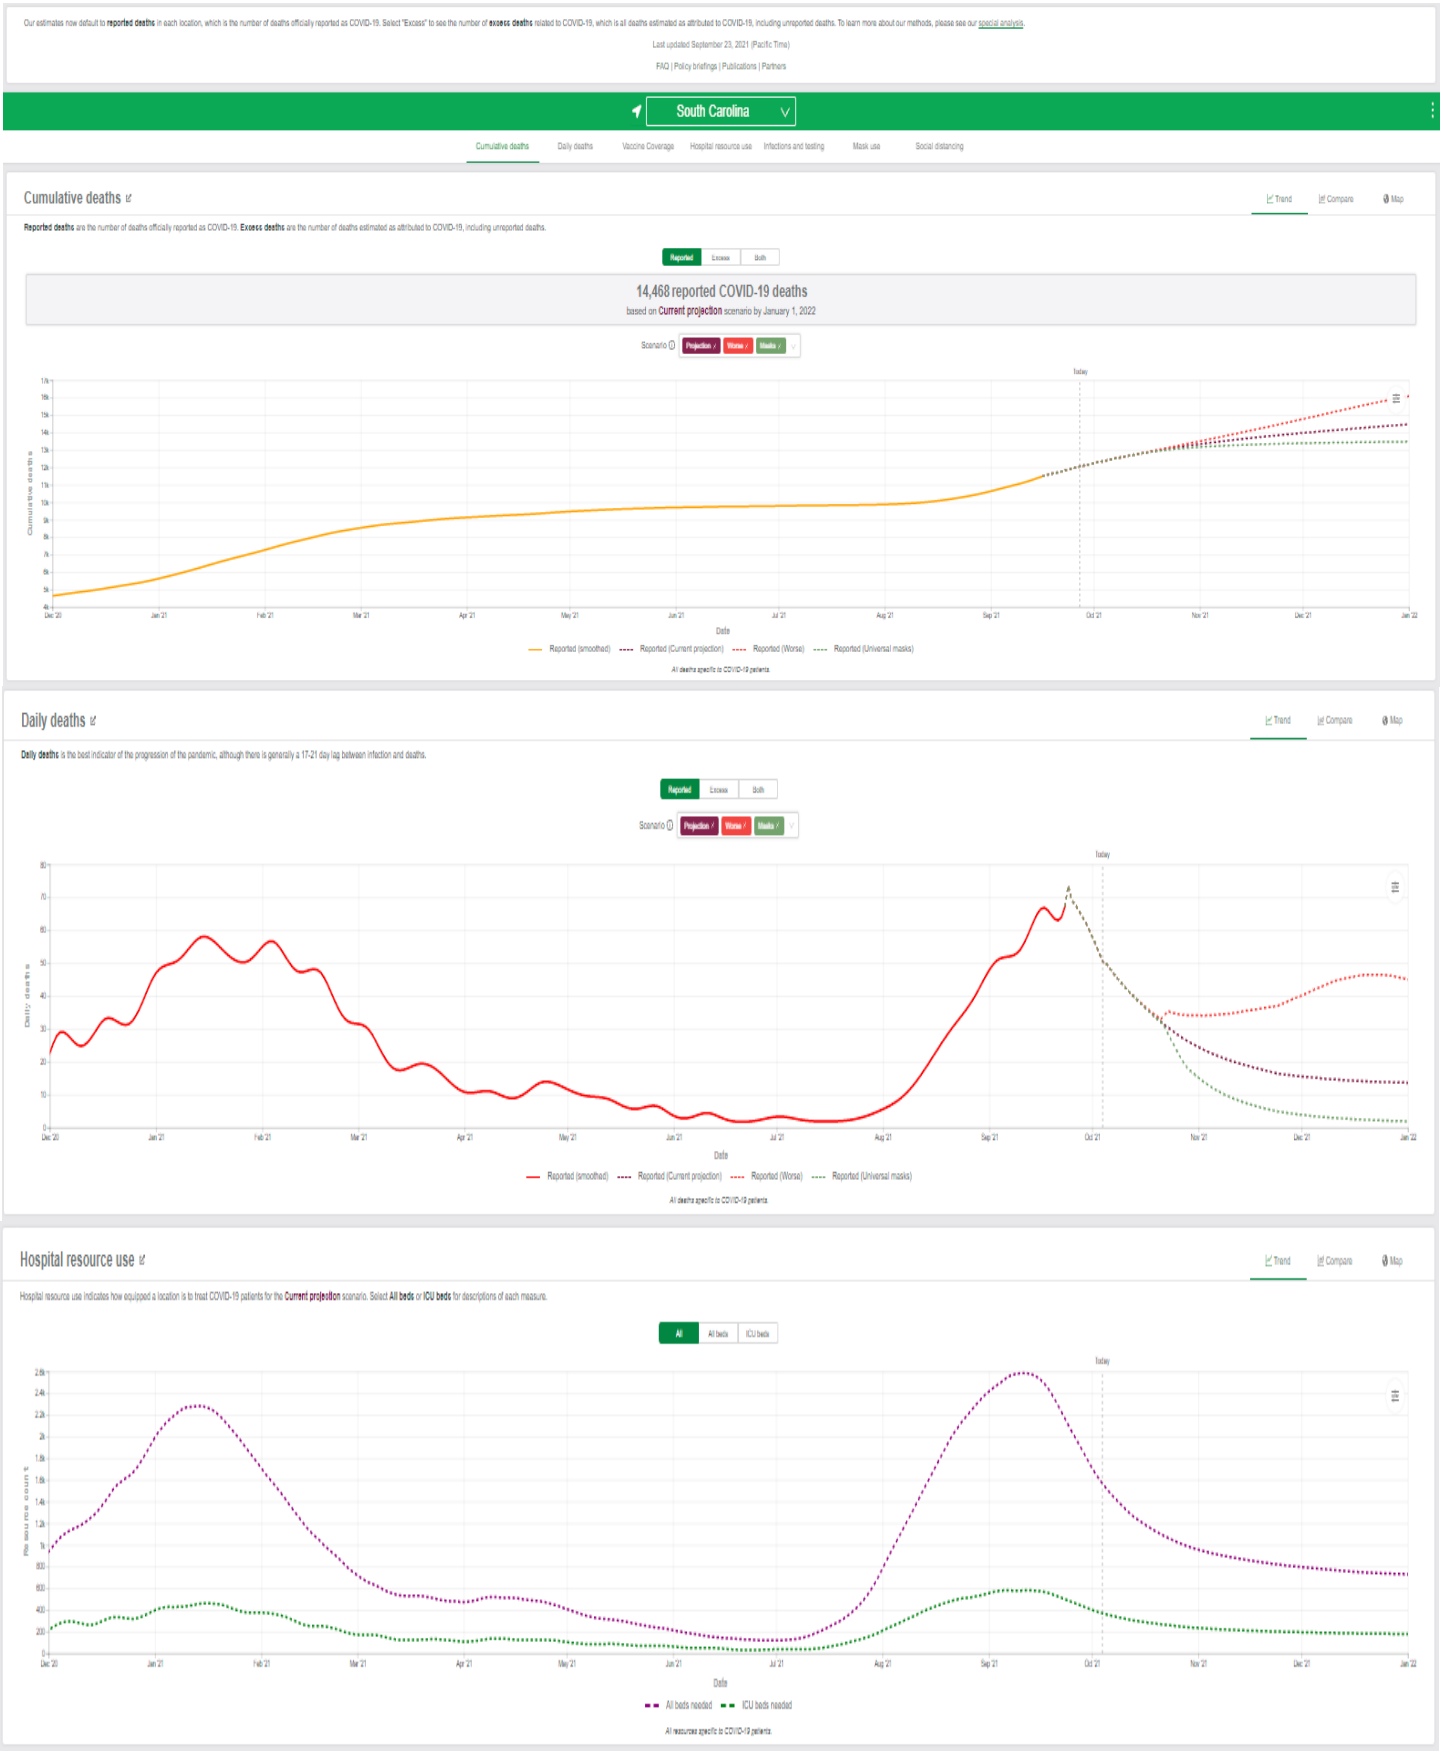
IHME Model



Our estimates now default to reported deaths in each location, which is the number of deaths officially reported as COVID-19. Select "Excess" to see the number of excess deaths related to COVID-19, which is all deaths estimated as attributed to COVID-19, including unreported deaths. To learn more about our methods, please see our special analysis.

All deaths specific to COVID-19 patients
Daily deaths
Daily deaths is the best indicator of the progression of the pandemic, although there is generally a 17-21 day lag between infection and deaths.
Hospital resource use
Hospital resource use indicates how equipped a location is to treat COVID-19 patients for the Current projection scenario. Select All beds or ICU beds for descriptions of each measure.

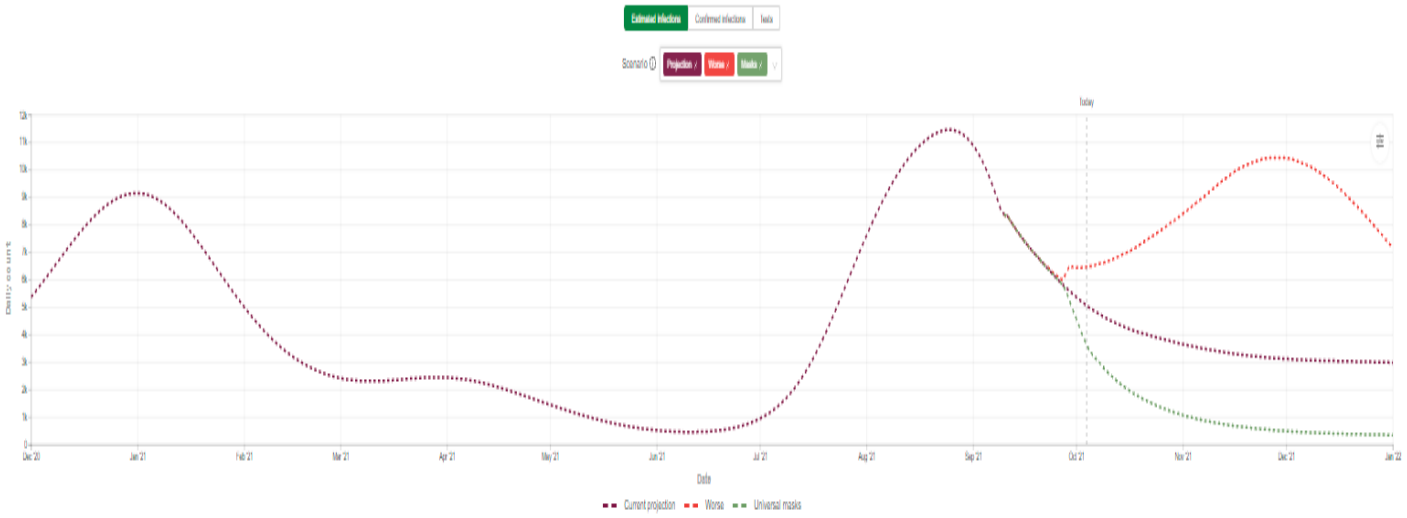
Daily infections and testing

Trend | Compare | Map

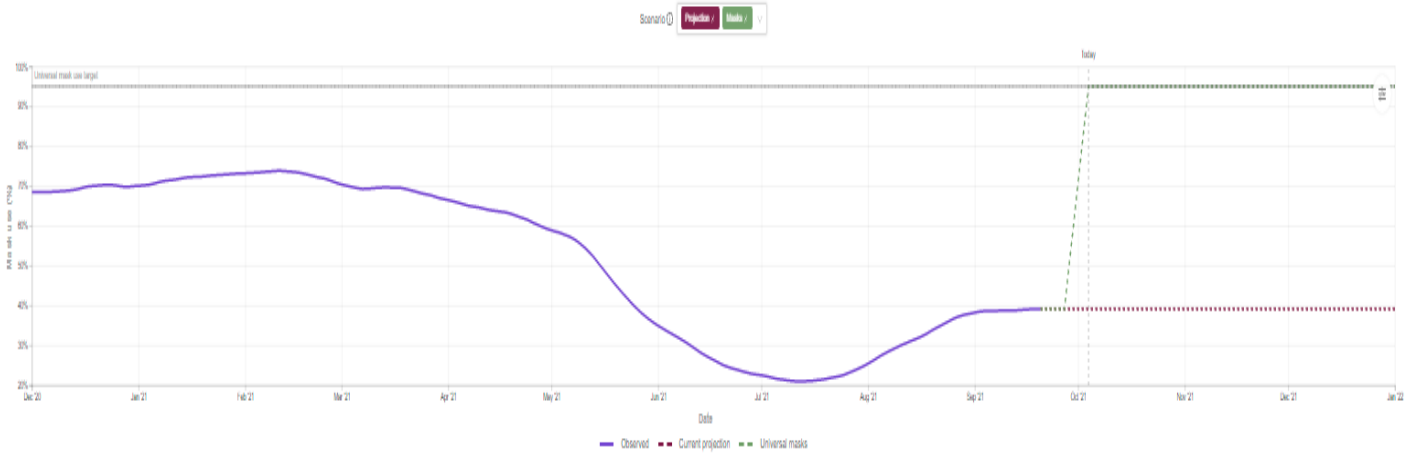
Estimated infections are the number of people we estimate are infected with COVID-19 each day, including those not tested.



Mask use

Trend | Compare | Map

Mask use represents the percentage of the population who say they always wear a mask in public. Mask use can reduce transmission by 30% or more.

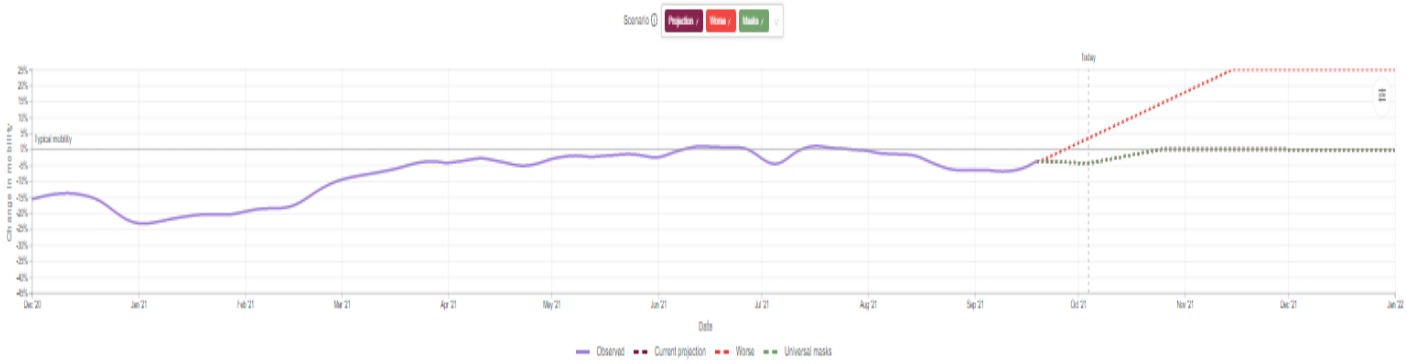


Data sources: Premise (US only); The Delphi Group at Carnegie Mellon University and University of Maryland COVID-19 Trends and Impact Surveys, in partnership with Facebook; Kaiser Family Foundation; YouGov COVID-19 Behaviour Tracker survey.

Social distancing

Trend | Compare | Map

Reducing human contact (as measured by cell phone **mobility** data) can drive down infections so that mask use, testing, isolation, and contact tracing can work to contain the virus.



SC Reproduction Number Estimate

Summary (estimates as of the 2021-10-01)

Table 1: Latest estimates (as of the 2021-10-01) of the number of confirmed cases by date of infection, the expected change in daily confirmed cases, the effective reproduction number, the growth rate, and the doubling time (when negative this corresponds to the halving time). The median and 90% credible interval is shown for each numeric estimate.

	Estimate
New confirmed cases by infection date	1689 (310 – 8615)
Expected change in daily cases	Likely decreasing
Effective reproduction no.	0.87 (0.49 – 1.4)
Rate of growth	-0.036 (-0.15 – 0.11)
Doubling/halving time (days)	-19 (6.4 – -4.5)

Confirmed cases, their estimated date of report, date of infection, and time-varying reproduction number estimates
