State Profile Report
10.27.2022

South Carolina

State Synopsis

	Last Week	Change from Previous Week
New COVID-19 Cases per 100,000	60	-2%
Nucleic Acid Amplification Test (NAAT) positivity rate	7.1%	-0.5%
New Confirmed COVID-19 Hospital Admissions per 100,000	4.6	+8%
New COVID-19 Deaths per 100,000	1.0	-14%

COVID-19 Vaccinations

Total fully vaccinated	3,042,157 people	59.1% of total pop.
<5 years with at least one dose	11,016 people	3.8% of <5 pop.
5+ years fully vaccinated	3,036,438 people	62.5% of 5+ pop.
12+ years received booster	1,311,537 people	44.5% of 12+ fully vaccinated pop.
65+ years received booster	570,579 people	67.3% of 65+ fully vaccinated pop.

SARS-CoV-2 Variants of Concern

- In the 4 weeks ending 10/1/2022, the following proportions of variants of concern were identified in [South Carolina](#): Omicron: BA.2, 0.1%; BA.2.12.1, 0.2%; BA.4, 1.8%; BA.4.6, 16.0%; BA.5, 76.7%; BA.2.75, 1.1%; BA.2.75.2, 0.1%; BF.7, 3.1%; BQ.1, 0.7%

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

COVID-19

South Carolina

State Profile Report | 10.27.2022

	State	State, % change from previous week	FEMA/HHS Region	United States	
New COVID-19 Cases (rate per 100,000)	3,093 (60)	-2%	40,881 (61)	265,872 (80)

	5+ years fully vaccinated (% of population)	4,967 (0.10%)	+4.1%	73,785 (0.12%)	305,124 (0.10%)
	12+ years booster dose	6,528	+0.8%	100,102	446,606
	12+ years 2nd booster dose	19,890	+3.7%	261,388	1,530,302
	65+ years booster dose	3,025	-3.5%	44,855	171,234
	65+ years 2nd booster dose	10,269	+2.5%	124,248	582,240

* Indicates absolute change in percentage points.

† Due to delayed reporting, this figure may underestimate total diagnostic tests and week-on-week changes in diagnostic tests.

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Cases and Deaths: COVID-19 case and death metrics at the state level are generated using a dataset managed by the CDC which is compiled from state and local health departments; this dataset is updated weekly. State values are aggregated from counties. Historical reports of cases and deaths exceeding 5% of the total new cases or deaths reported in the US that day have been excluded. Data are through 10/26/2022; previous week is from 10/13 to 10/19.

Testing: CERS (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Test positivity through 10/24/2022; previous week is from 10/11 to 10/17. Test volume through 10/26/2022; previous week is from 10/7 to 10/13.

Admissions: Unified Hospitals Dataset in HHS Protect. Data are through 10/25; previous week is from 10/12 to 10/18.

Shortages: Unified Hospitals Dataset in HHS Protect. Values presented show the latest reports from hospitals in the week ending 10/19/2022 for supplies.

Vaccinations: CDC COVID Data Tracker. Data include the Moderna, Pfizer-BioNTech, J&J/Janssen, and Novavax COVID-19 vaccines. Data last updated 04:00 EDT on 10/26/2022. People initiating vaccination include those who have received the first dose of the Moderna, Pfizer-BioNTech, or Novavax vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Population denominators reflect the subset of the population of the corresponding age range.

METHODS: Details available on last two pages of report.

Percent of Population Fully Vaccinated

Percent of Fully Vaccinated 12+ Population with a Booster Dose

DATA SOURCES

County reporting completeness for South Carolina is 93.0%.

†Booster dose percentages are a proportion of the respective population that is fully vaccinated.

‡Second Booster dose percentages are a proportion of the respective population that has one booster.

Vaccinations: CDC COVID Data Tracker. Data includes the Moderna, Pfizer BioNTech, J&J/Janssen, and Novavax COVID-19 vaccines. Data last updated 04:00 EDT on 10/26/2022. Persons who are fully vaccinated include those who have received both doses of the Moderna, Pfizer-BioNTech, or Novavax vaccine as well as those who have received one dose of the J&J/Janssen vaccine.

METHODS: Details available on last two pages of report.

COVID-19

South Carolina

State Profile Report | 10.27.2022

68 hospitals are expected to report in South Carolina

Hospital Admissions

Hospital Utilization

DATA SOURCES

Hospitalizations: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Inpatient and ICU utilization is shown as a weekly rate; the weekly average of beds occupied is divided by the weekly average of total beds available. Data are through 10/25/2022.

METHODS: Details available on last two pages of report.

COVID-19

South Carolina

State Profile Report | 10.27.2022

COVID-19 Community Level by county

Counties by COVID-19 Community Level

Category	Low	Medium	High
# of Counties (change)	46 (0)	0 (0)	0 (0)

All Low Counties: Abbeville, Aiken, Allendale, Anderson, Bamberg, Barnwell, Beaufort, Berkeley, Calhoun, Charleston, Cherokee, Chester, Chesterfield, Clarendon, Colleton, Darlington, Dillon, Dorchester, Edgefield, Fairfield, Florence, Georgetown, Greenville, Greenwood, Hampton, Horry, Jasper, Kershaw, Lancaster, Laurens, Lee, Lexington, Marion, Marlboro, McCormick, Newberry, Oconee, Orangeburg, Pickens, Richland, Saluda, Spartanburg, Sumter, Union, Williamsburg, York.

DATA SOURCES

Maps and figures reflect 7-day average of data from 10/20-10/26 (cases), 10/19-10/25 (hospital data). Metro areas and counties are listed in alphabetical order. **Note:** Most recent days may have incomplete reporting.

Cases: COVID-19 case metrics at the state and County level are generated using a dataset managed by the CDC which is compiled from state and local health departments; this dataset is updated weekly. Data are through 10/26/2022.

Admissions: Unified Hospitals Dataset in HHS Protect. Data are through 10/25/2022.

COVID-19 Community Levels: COVID-19 Community Level is determined by the higher of the new admissions and inpatient bed metrics, based on the current level of new cases per 100,000 population in the past 7 days. See [CDC Community Levels](#). A county is N/A if hospital data is not available. County data is mapped from Health Service Areas, defined as a single county or cluster of counties that are generally self-contained with respect to hospital care. Previous week levels are computed based on current data.

METHODS: Details available on last two pages of report.

COVID-19

South Carolina

State Profile Report | 10.27.2022

Case Rates, NAAT Positivity, Hospital Admissions, and Death Rates

New Cases per 100,000

Nucleic Acid Amplification Test (NAAT) Positivity

Confirmed new COVID-19 Admissions per 100,000

New Deaths per 100,000

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Cases and Deaths: COVID-19 case and death metrics at the County level are generated using a dataset managed by the CDC which is compiled from state and local health departments; this dataset is updated weekly. Data are through 10/26/2022.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Data are through 10/24/2022.

Hospitalizations: Unified Hospitals Dataset in HHS Protect. Totals include only confirmed COVID-19 admissions. County data is mapped from [Health Service Areas](#), defined as a single county or cluster of counties that are generally self-contained with respect to hospital care. Hospitals are assigned to an HSA based on county of location. In some cases, reports are aggregates of multiple facilities that cross HSA boundaries; in these cases, values are assigned based on the county for the aggregate. Data are through 10/25/2022.

METHODS: Details available on last two pages of report.

Daily National Count of Vaccine Doses Administered by Date of Administration

DATA SOURCES

†Booster dose percentages are a proportion of the respective population that is fully vaccinated. ‡Second Booster dose percentages are a proportion of the respective population that has one booster. Vaccinations: [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer-BioNTech, J&J/Janssen, and Novavax COVID-19 vaccines. Data last updated 04:00 EDT on 10/26/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna, Pfizer-BioNTech, or Novavax vaccine as well as those who have received one dose of the J&J/Janssen vaccine. The count of people who received a booster dose includes anyone who is fully vaccinated and has received another dose of COVID-19 vaccine since August 13, 2021. This includes people who received booster doses and people who received additional doses. Due to delays in reporting, data on doses administered in recent days (as reflected by lighter purple coloring in the Daily National Count figure) may be an underestimate of the actual value.

METHODS: Details available on last two pages of report.

COVID-19

National Picture: Vaccinations

National Summary of Vaccinations by Race/Ethnicity

National Summary of Vaccinations by Age

DATA SOURCES

Vaccinations: [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer-BioNTech, J&J/Janssen, and Novavax COVID-19 vaccines. Data last updated: 04:00 EDT on 10/26/2022. Persons who are fully vaccinated include those who have received both doses of the Moderna, Pfizer-BioNTech, or Novavax vaccine as well as those who have received one dose of the J&J/Janssen vaccine. The count of people who received a booster dose includes anyone who is fully vaccinated and has received another dose of COVID-19 vaccine since August 13, 2021. This includes people who received booster doses and people who received additional doses. Race/Ethnicity data were available for 75.0% receiving at least one dose and 78.5% fully vaccinated. Age data were available for 95.7% receiving at least one dose and 96.1% fully vaccinated. Texas does not report demographic-specific dose number information to CDC, so data for Texas are not represented in demographic trends figures. "NH" stands for Non-Hispanic/Latino, "AI/AN" stands for American Indian or Alaska Native, and "NH/PI" stands for Native Hawaiian or Pacific Islander.

METHODS: Details available on last two pages of report.

13	CO	39	VA
14	AZ	40	SC
15	MT	41	PA
16	RI	42	SD
17	MO	43	NM
18	IN	44	FL
19	IL	45	OK
20	AL	46	WV
21	OH	47	MA
22	LA	48	KY
23	WI	49	MI
24	CT	50	AR
25	GA	51	AK
26	DC	52	NY

New Deaths per 100,000 in the Week:

One Month Before

Two Months Before

Three Months Before

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes. Some states report deaths by date of death, periodically backfilling from their data by date of report. This can result in under-estimates or fluctuations in the number of deaths reported in the last week.

Deaths: COVID-19 case metrics at the county level are generated using a dataset managed by the CDC which is compiled from state and local health departments; this dataset is updated weekly. State values are aggregated from counties. As of 3/2/2021, Ohio changed their method of reporting COVID-19 deaths and will report deaths on the day of death, not the day of report, which could result in a fluctuation in the number of deaths from recent weeks due to delayed reporting. As of 4/7/2022, North Dakota is no longer reporting county-level deaths; therefore, county-level death counts from this date forward are no longer available. Puerto Rico is shown at the territory level as deaths are not reported at the municipio level. The week one month before is from 9/22 to 9/28; the week two months before is from 8/25 to 9/01; the week three months before is from 7/28 to 8/3.

METHODS: Details available on last two pages of report.

COVID-19

National Picture: COVID-19 Community Level

COVID-19 Community Level by County

Counties by COVID-19 Community Level Component Metrics

<200 Cases per 100K			
Admissions per 100K	<10.0	10.0 to 19.9	20.0+
# of counties (change)	2,441 (+176)	556 (+101)	41 (+12)
% of counties (change)	75.8% (+5.5%)	17.3% (+3.1%)	1.3% (+0.4%)
COVID Inpatient Occupancy	<10.0%	10.0% to 14.9%	15.0%+
# of counties (change)	3,019 (+54)	16 (+9)	3 (0)
% of counties (change)	93.8% (+1.7%)	0.5% (+0.3%)	0.1% (0.0%)
200+ Cases per 100K			
Admissions per 100K	<10.0	10.0+	
# of counties (change)	150 (+51)	29 (+12)	
% of counties (change)	4.7% (+1.6%)	0.9% (+0.4%)	
COVID Inpatient Occupancy	<10.0%	10.0%+	
# of counties (change)	178 (+62)	1 (+1)	
% of counties (change)	5.5% (+1.9%)	0.0% (+0.0%)	

Counties by COVID-19 Community Level

Category	Low	Medium	High
# of Counties (Change)	2,439 (+167)	705 (+140)	73 (+27)
% of Counties (Change)	75.7% (+5.2%)	21.9% (+4.3%)	2.3% (+0.8%)

DATA SOURCES

Maps and figures reflect 7-day average of data from 10/20-10/26 (cases), 10/19-10/25 (hospital data).

Note: Most recent days may have incomplete reporting.

Cases: COVID-19 case metrics at the county level are generated using a dataset managed by the CDC which is compiled from state and local health departments; this dataset is updated weekly. Data are through 10/26/2022.

Admissions: Unified Hospitals Dataset in HHS Protect. Data are through 10/25/2022.

County Percentages: Based on a denominator of 3,220 county/county-equivalents, including states, the District of Columbia, and Puerto Rico municipalities.

COVID-19 Community Levels: COVID-19 Community Level is determined by the higher of the new admissions and inpatient bed metrics, based on the current level of new cases per 100,000 population in the past 7 days. See [CDC Community Levels](#). A county is N/A if hospital data is not available. County data is mapped from Health Service Areas, defined as a single county or cluster of counties that are generally self-contained with respect to hospital care. Previous week levels are computed based on current data.

METHODS: Details are available on last two pages of report.

IHME Model

IHME updates its COVID-19 models and forecasts on a monthly basis. In the meantime, our researchers will keep track of any developments that might require more frequent updates.

Last updated: October 21, 2022 (Pacific Time)

South Carolina

Cumulative deaths Daily deaths Vaccine coverage Hospital resource use Infections and testing Mask use Social distancing

Cumulative deaths

Trend Compare Map

Reported deaths are the number of deaths officially reported as due to COVID-19. **Total deaths** are the estimated number of deaths attributable to COVID-19, including unreported deaths.

Reported Total Both

18,747 reported COVID-19 deaths

based on **Current projection** scenario by February 1, 2023

Scenario Projection Masks Antidotes

Daily deaths

Trend Compare Map

Daily deaths is the best indicator of the progression of the pandemic, although there is generally a 17-21 day lag between infection and deaths.

Reported Total Both

Scenario Projection Masks Antidotes

Vaccine Coverage

Trend Compare Map

Vaccine coverage shows the percentage of people who receive **at least one dose** of a vaccine, and those who are **fully vaccinated** against COVID-19.

Hospital resource use

[Trend](#) [Compare](#) [Map](#)

Hospital resource use indicates how equipped a location is to treat COVID-19 patients for the **Current projection** scenario. Select **All beds** or **ICU beds** for descriptions of each measure.

Daily infections and testing

[Trend](#) [Compare](#) [Map](#)

Estimated infections are the number of people we estimate are infected with COVID-19 each day, including those not tested.

Mask use

[Trend](#) [Compare](#) [Map](#)

Mask use represents the percentage of the population who say they always wear a mask in public. Mask use can reduce transmission by 30% or more.
