State Profile Report
12.01.2022

South Carolina

State Synopsis

	Last Week	Change from Previous Week
New COVID-19 Cases per 100,000	59	-1%
Nucleic Acid Amplification Test (NAAT) positivity rate	10.2%	+3.5%
New Confirmed COVID-19 Hospital Admissions per 100,000	5.1	+35%
New COVID-19 Deaths per 100,000	0.1	-86%

COVID-19 Vaccinations

Total fully vaccinated	3,062,294 people	59.5% of total pop.
<5 years with at least one dose	12,368 people	4.2% of <5 pop.
5+ years fully vaccinated	3,055,244 people	62.9% of 5+ pop.
12+ years received booster	1,337,073 people	45.1% of 12+ fully vaccinated pop.
65+ years received booster	581,653 people	68.1% of 65+ fully vaccinated pop.

SARS-CoV-2 Variants of Concern

- In the 4 weeks ending 11/5/2022, the following proportions of variants of concern were identified in [South Carolina](#): Omicron: BA.4, 1.1%; BA.4.6, 10.7%; BA.5, 56.6%; BA.5.2.6, 3.4%; BA.2.75, 1.2%; BF.7, 8.7%; BF.11, 0.9%; BQ.1, 6.7%; BQ.1.1, 8.9%; BN.1, 1.3%; XBB, 0.5%

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to <https://www.cdc.gov/dca/ContactUs/Form>.

State Profile Report | 12.01.2022

	State	State, % change from previous week	FEMA/HHS Region	United States	
New COVID-19 Cases (rate per 100,000)	3,028 (59)	-1%	44,765 (67)	303,101 (91)	
Nucleic Acid Amplification Test (NAAT) Positivity Rate	10.2%	+3.5%*	9.8%	10.7%	
Total NAAT Volume † (tests per 100,000)	26,892 (522)	-22%	359,440 (537)	2,205,631 (664)	
New COVID-19 Deaths (rate per 100,000)	4 (0.1)	-86%	381 (0.6)	1,780 (0.5)	
Confirmed new COVID-19 Hospital Admissions (rate per 100,000)	264 (5.1)	+35%	4,075 (6.1)	29,407 (8.9)	
COVID-19 Inpatient Occupancy	2%	0%*	2%	4%	
Hospitals With Supply Shortages (%)	6 (9%)	0%	34 (3%)	256 (5%)	
COVID-19 Vaccinations	<5 years first dose (% of population)	108 (0.04%)	-67.7%	1,805 (0.05%)	21,984 (0.11%)
	<5 years fully vaccinated (% of population)	100 (0.03%)	-67.5%	1,513 (0.04%)	20,924 (0.11%)
	5+ years first dose (% of population)	2,066 (0.04%)	-59.0%	37,977 (0.06%)	N/A
	5+ years fully vaccinated (% of population)	1,819 (0.04%)	-49.7%	30,161 (0.05%)	N/A
	12+ years booster dose	2,255	-50.0%	42,021	497,303
	12+ years 2nd booster dose	6,078	-52.2%	114,219	1,113,882
	65+ years booster dose	895	-54.7%	17,416	103,445
65+ years 2nd booster dose	2,670	-58.9%	55,727	319,845	

* Indicates absolute change in percentage points.

† Due to delayed reporting, this figure may underestimate total diagnostic tests and week-on-week changes in diagnostic tests.

DATASOURCES

Note: Some data may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Cases and Deaths: COVID-19 case and death metrics at the state level are generated using a dataset managed by the CDC which is compiled from state and local health departments; this dataset is updated weekly. State values are aggregated from counties. Historical reports of cases and deaths exceeding 1% of the total new cases or deaths reported in the US that day have been excluded. Data are through 11/30/2022; previous week is from 11/17 to 11/23.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Test positivity through 11/28/2022; previous week is from 11/15 to 11/21. Test volume through 11/24/2022; previous week is from 11/11 to 11/17.

Admissions: Unified Hospitals Dataset in HHS Protect. Data are through 11/29; previous week is from 11/16 to 11/22.

Shortages: Unified Hospitals Dataset in HHS Protect. Values presented show the latest reports from hospitals in the week ending 11/23/2022 for supplies.

Vaccinations: <https://data.cdc.gov/dataset-detail/covid-19-vaccine-reporting-system>. Data include the Moderna, Pfizer BioNTech, J&J/Janssen, and Novavax COVID-19 vaccines. Data last updated 04:00 EST on 11/30/2022. People initiating vaccination include those who have received the first dose of the Moderna, Pfizer-BioNTech, or Novavax vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Population denominators reflect the subset of the population of the corresponding age range. California and Illinois recently issued corrections to their vaccination data, resulting in negative values for some age groups initiating vaccination in those states/territories as well as Region 9 and at the national level.

METHODS: Details available on last two pages of report.

18+ years	3,290,723 (81.5%)	2,788,353 (69.1%)	1,296,982 (46.5%)	434,890 (33.5%)
65+ years	988,027 (95.0%)	854,111 (91.2%)	581,653 (68.1%)	274,188 (47.1%)

Percent of Population Fully Vaccinated

Percent of Fully Vaccinated 12+ Population with a Booster Dose

DATA SOURCES

County reporting completeness for South Carolina is 93.0%.

†Booster dose percentages are a proportion of the respective population that is fully vaccinated.

‡Second Booster dose percentages are a proportion of the respective population that has one booster.

Vaccinations: CDC COVID Data Tracker. Data includes the Moderna, Pfizer BioNTech, J&J/Janssen, and Novavax COVID-19 vaccines. Data last updated 04:00 EST on 11/30/2022. Persons who are fully vaccinated include those who have received both doses of the Moderna, Pfizer-BioNTech, or Novavax vaccine as well as those who have received one dose of the J&J/Janssen vaccine.

METHODS: Details available on last two pages of report.

COVID-19

South Carolina

State Profile Report | 12.01.2022

68 hospitals are expected to report in South Carolina

Hospital Admissions

Hospital Utilization

DATA SOURCES

Hospitalizations: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Inpatient and ICU utilization is shown as a weekly rate; the weekly average of beds occupied is divided by the weekly average of total beds available. Data are through 11/29/2022.

METHODS: Details available on last two pages of report.

COVID-19

South Carolina

State Profile Report | 12.01.2022

COVID-19 Community Level by county

Counties by COVID-19 Community Level

Category	Low	Medium	High
# of Counties (change)	46 (0)	0 (0)	0 (0)

Low Counties: Abbeville, Aiken, Allendale, Anderson, Bamberg, Barnwell, Beaufort, Berkeley, Calhoun, Charleston, Cherokee, Chester, Chesterfield, Clarendon, Colleton, Darlington, Dillon, Dorchester, Edgefield, Fairfield, Florence, Georgetown, Greenville, Greenwood, Hampton, Horry, Jasper, Kershaw, Lancaster, Laurens, Lee, Lexington, Marion, Marlboro, McCormick, Newberry, Oconee, Orangeburg, Pickens, Richland, Saluda, Spartanburg, Sumter, Union, Williamsburg, York

DATA SOURCES

Maps and figures reflect 7-day average of data from 11/24-11/30 (cases), 11/23-11/29 (hospital data). Metro areas and counties are listed in alphabetical order.

Note: Most recent days may have incomplete reporting.

Cases: COVID-19 case metrics at the state and County level are generated using a dataset managed by the CDC which is compiled from state and local health departments; this dataset is updated weekly. Data are through 11/30/2022.

Admissions: Unified Hospitals Dataset in HHS Protect. Data are through 11/29/2022.

COVID-19 Community Levels: COVID-19 Community Level is determined by the higher of the new admissions and inpatient bed metrics, based on the current level of new cases per 100,000 population in the past 7 days. See [CDC Community Levels](#). A county is N/A if hospital data is not available. County data is mapped from Health Service Areas, defined as a single county or cluster of counties that are generally self-contained with respect to hospital care. Previous week levels are computed based on current data.

METHODS: Details available on last two pages of report.

COVID-19

South Carolina

State Profile Report | 12.01.2022

Case Rates, NAAT Positivity, Hospital Admissions, and Death Rates

New Cases per 100,000

Nucleic Acid Amplification Test (NAAT) Positivity

Confirmed new COVID-19 Admissions per 100,000

New Deaths per 100,000

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Cases and Deaths: COVID-19 case and death metrics at the County level are generated using a dataset managed by the CDC which is compiled from state and local health departments; this dataset is updated weekly. Data are through 11/30/2022.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Data are through 11/28/2022.

Hospitalizations: Unified Hospitals Dataset in HHS Protect. Totals include only confirmed COVID-19 admissions. County data is mapped from [Health Service Areas](#), defined as a single county or cluster of counties that are generally self contained with respect to hospital care. Hospitals are assigned to an HSA based on county of location. In some cases, reports are aggregates of multiple facilities that cross HSA boundaries; in these cases, values are assigned based on the county for the aggregate. Data are through 11/29/2022.

METHODS: Details available on last two pages of report.

Daily National Count of Vaccine Doses Administered by Date of Administration

DATA SOURCES

†Booster dose percentages are a proportion of the respective population that is fully vaccinated. ‡Second Booster dose percentages are a proportion of the respective population that has one booster. Vaccinations: [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, J&J/Janssen, and Novavax COVID-19 vaccines. Data last updated 04:00 EST on 11/30/2022. Persons who are fully vaccinated include those who have received both doses of the Moderna, Pfizer-BioNTech, or Novavax vaccine as well as those who have received one dose of the J&J/Janssen vaccine. The count of people who received a booster dose includes anyone who is fully vaccinated and has received another dose of COVID-19 vaccine since August 13, 2021. This includes people who received booster doses and people who received additional doses. Due to delays in reporting, data on doses administered in recent days (as reflected by lighter purple coloring in the Daily National Count figure) may be an underestimate of the actual value.

METHODS: Details available on last two pages of report.

COVID-19

National Picture: Vaccinations

National Summary of Vaccinations by Race/Ethnicity

National Summary of Vaccinations by Age

DATA SOURCES

Vaccinations: [CDC COVID-19 Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, J&J/Janssen, and Novavax COVID-19 vaccines. Data last updated 04:00 EST on 11/30/2022. Persons who are fully vaccinated include those who have received both doses of the Moderna, Pfizer-BioNTech, or Novavax vaccine as well as those who have received one dose of the J&J/Janssen vaccine. The count of people who received a booster dose includes anyone who is fully vaccinated and has received another dose of COVID-19 vaccine since August 13, 2021. This includes people who received booster doses and people who received additional doses. Race/Ethnicity data were available for 75.6% receiving at least one dose and 79.0% fully vaccinated. Age data were available for 100.0% receiving at least one dose and 100.0% fully vaccinated. Texas does not report demographic-specific dose number information to CDC, so data for Texas are not represented in demographic trends figures. "NH" stands for Non-Hispanic/Latinx, "AI/AN" stands for American Indian or Alaska Native, and "NH/PI" stands for Native Hawaiian or Pacific Islander.

METHODS: Details available on last two pages of report.

New Cases per 100,000 in the Week:

One Month Before

Two Months Before

Three Months Before

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Cases: COVID-19 case metrics at the county level are generated using a dataset managed by the CDC which is compiled from state and local health departments; this dataset is updated weekly. State values are aggregated from counties. The week one month before is from 10/27 to 11/2; the week two months before is from 9/29 to 10/5; the week three months before is from 9/1 to 9/7. Due to the Thanksgiving holiday, Mississippi's reported cases in the last week may be an overestimate and Ohio shifted its reporting cadence and therefore does not have case data for the last week.

METHODS: Details available on last two pages of report.

Nucleic Acid Amplification Test (NAAT) Positivity in the Week:

One Month Before

Two Months Before

Three Months Before

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Data are through 11/28/2022. The week one month before is from 10/25 to 10/31; the week two months before is from 9/27 to 10/3; the week three months before is from 8/30 to 9/5. As of February 17, 2022, Iowa is no longer reporting negative test results; therefore, test volume and test positivity from this date forward is no longer presented. Due to reporting delays, California and Nevada's test positivity (and test volume) may be incomplete for the last week.

METHODS: Details available on last two pages of report.

New Deaths per 100,000 in the Week:

One Month Before

Two Months Before

Three Months Before

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes. Some states report deaths by date of death, periodically backfilling from their data by date of report. This can result in under-estimates or fluctuations in the number of deaths reported in the last week.

Deaths: COVID-19 case metrics at the county level are generated using a dataset managed by the CDC which is compiled from state and local health departments; this dataset is updated weekly. State values are aggregated from counties. As of 3/2/2021, Ohio changed their method of reporting COVID-19 deaths and will report deaths on the day of death, not the day of report, which could result in a fluctuation in the number of deaths from recent weeks due to delayed reporting. As of 4/7/2022, North Dakota is no longer reporting county-level deaths; therefore, county-level death counts from this date forward are no longer available. Puerto Rico is shown at the territory level as deaths are not reported at the municipio level. The week one month before is from 10/27 to 11/2; the week two months before is from 9/29 to 10/5; the week three months before is from 9/1 to 9/7. Due to the Thanksgiving holiday, Mississippi's reported deaths in the last week may be an overestimate and Ohio shifted its reporting cadence and therefore does not have death data for the last week.

METHODS: Details available on last two pages of report.

COVID-19

National Picture: COVID-19 Community Level

COVID-19 Community Level by County

Counties by COVID-19 Community Level Component Metrics

<200 Cases per 100K			
Admissions per 100K	<10.0	10.0 to 19.9	20.0+
# of counties (change)	2,233 (+280)	699 (+250)	96 (+43)
% of counties (change)	69.3% (+8.7%)	21.7% (+7.8%)	3.0% (+1.3%)
COVID Inpatient Occupancy	<10.0%	10.0% to 14.9%	15.0%+
# of counties (change)	3,016 (+14)	5 (+7)	7 (+6)
% of counties (change)	93.7% (+0.4%)	0.2% (+0.2%)	0.2% (+0.2%)
200+ Cases per 100K			
Admissions per 100K	<10.0	10.0+	
# of counties (change)	102 (+36)	82 (+18)	
% of counties (change)	3.2% (+1.1%)	2.5% (+0.6%)	
COVID Inpatient Occupancy	<10.0%	10.0%+	
# of counties (change)	180 (+19)	4 (+1)	
% of counties (change)	5.6% (+0.6%)	0.1% (+0.0%)	

Counties by COVID-19 Community Level

Category	Low	Medium	High
# of Counties (Change)	2,231 (+277)	799 (+209)	182 (+63)
% of Counties (Change)	69.3% (+8.6%)	24.8% (+6.5%)	5.7% (+2.0%)

DATA SOURCES

Maps and figures reflect 7-day average of data from 11/24-11/30 (cases), 11/23-11/29 (hospital data).

Note: Most recent days may have incomplete reporting.

Cases: COVID-19 case metrics at the county level are generated using a dataset managed by the CDC which is compiled from state and local health departments; this dataset is updated weekly. Data are through 11/30/2022. Due to the Thanksgiving holiday, Mississippi's reported cases in the last week may be an overestimate and Ohio shifted its reporting cadence and therefore does not have case data for the last week.

Admissions: Unified Hospitals Dataset in HHS Protect. Data are through 11/29/2022.

County Percentages: Based on a denominator of 3,220 county/county-equivalents, including states, the District of Columbia, and Puerto Rico municipalities.

COVID-19 Community Levels: COVID-19 Community Level is determined by the higher of the new admissions and inpatient bed metrics, based on the current level of new cases per 100,000 population in the past 7 days. See [CDC Community Levels](#). A county is N/A if hospital data is not available. County data is mapped from Health Service Areas, defined as a single county or cluster of counties that are generally self-contained with respect to hospital care. Previous week levels are computed based on current data.

METHODS: Details available on last two pages of report.

IHME Model

IHME updates its COVID-19 models and forecasts on a monthly basis. In the meantime, our researchers will keep track of any developments that might require more frequent updates.

South Carolina

Cumulative deaths Daily deaths Vaccine Coverage Hospital resource use Daily infections Mask use

Cumulative deaths

Trend Compare Map

Reported deaths are the number of deaths officially reported as due to COVID-19. Total deaths are the estimated number of deaths attributable to COVID-19, including unreported deaths.

Reported Total Sub

19,022 reported COVID-19 deaths
based on Current projection scenario by March 1, 2023

Scenario: Reported Mask Use Antiviral Use

Daily deaths

Trend Compare Map

Daily deaths is the best indicator of the progression of the pandemic, although there is generally a 1-2 day lag between infection and death.

Reported Total Sub

Scenario: Reported Mask Use Antiviral Use

Vaccine Coverage

Trend Compare Map

Vaccine coverage shows the percentage of people who receive at least one dose of a vaccine, and those who are fully vaccinated against COVID-19.

Hospital resource use

[Test](#) [Compare](#) [Help](#)

Hospital resource use indicates how hospital resources are used to treat COVID-19 patients in the **Current projection** scenario. Select **All beds** or **ICU beds** for a description of each resource.

Daily infections

[Test](#) [Compare](#) [Help](#)

Confirmed infections are the number of people who are infected with COVID-19 each day, including those not tested.

Mask use

[Test](#) [Compare](#) [Help](#)

Mask use represents the percentage of the population who are always wearing a mask in public. Mask use can increase incrementally by 25% or more.
